HISTORY OF PRIVATE KIRŞEHİR SCHOOLS

Private Kırşehir Schools were opened in the 1991-1992 educational year and raised the quality of education with the conscious, enlightened, well-educated individuals which grows every day, has taken important steps with this 30 years of experience in the way of institutionalization.

It is obvious that every school with its historical culture and mission has determined both the educational understanding and the student model that it wants to train in line with these principles. When we analyze education system at our college carefully, we can list these characteristics that we can call the spirit of school :

Our school educates individuals who are

1. honest
2. Hardworking
3. Planned
4. Self-confident
5. The researcher and capable of applying the information obtained
6. Open to critical thinking
7. Capable of analytical reasoning power
8. Speaking the native language perfectly
9. Able to assimilate the national values and succeed in the relationship with the modern world
10. Competent to intellectual perspectives.

Private Kirsehir Schools were built on 25.000 square meters on Kirsehir-Kayseri road and it is a source of proud for our city with its modernized laboratories heated by central heating system.

OUR MISSION AND VISION

*To establish schools in Turkish and foreign languages and to open dormitories in order to provide accommodation for students.

*To train highly qualified students in the new opened schools.

*Providing scholarships throughout the country for successful children with inadequate financial support to allow them to continue their education.

*To establish scientific platforms that will bring Turkish educational standards to contemporary levels.

*To raise awareness on the problems and solutions of the education system with research projects.

*To have a major role in the formation of Turkish Education Policy.

The aim of Private Kirsehir Schools is to educate individuals who can think critically, have effective communication and have basic knowledge and skills in accordance with general aims and principles.

Our aim is to provide a democratic and contemporary education environment for our students, in the light of the principles of science, love and tolerance which form the basis of the education system in our school. In this environment, students gain individual learning, team work and they are provided by the activities that they are interested in such as arts, sports etc. These areas are encouraged to develop their skills.

Nowadays the social needs that emerged as a result of the rapid developments in science and technology have developed the lifelong learning human profile that will meet these needs. Lifelong learning accepted as a process that must be handled seriously at any age; to be able to reach the information, to interpret the obtained information, to adapt the information to the needs of the user which can be used and shared.

We live in the 21st century , where information is changing very rapidly and continuously, new teaching programs emphasize not only “how we learn” but also “ what we learn”. Interpreting the information, making it meaningful and making a relationship with daily life is the main objective. To have

information in any way and to store information passively mean to absorb it. The individual learns only when he has found his answers and incorporate the concepts into his mental processes.

At the Private Kirsehir Schools have a full-time and mixed education, besides the curriculum determined by the Ministry of National Education. In addition to the lessons of up to 40 hours per week, our students receive training on drama, social and cultural activities and sports in various branches.

In our school, students have been studying English since the first grade and from the first year onwards, they take courses such as visual arts, music, computers and physical education from branch teachers and expert instructors.

FIRST GRADES

In our school, there are two separate teachers in each class, two speaking only English. In this way, none of our children are overlooked.

In this educational model, the teachers, who spend 8-9 hours a day, take the place of their parents during the training, so that the English teacher is the only one who speaks English (but understands the student) and observes that it is a natural process to speak English.

In this way, our child understands that speaking English is not a special case and that it is a method of communication within the usual course of life and that it should be used to communicate with the teacher.

First graders start the day very positively. We know that, children learn naturally when they are having fun. We try to encourage them every they, because encouragement is the first step for learning.

OCTOBER 29

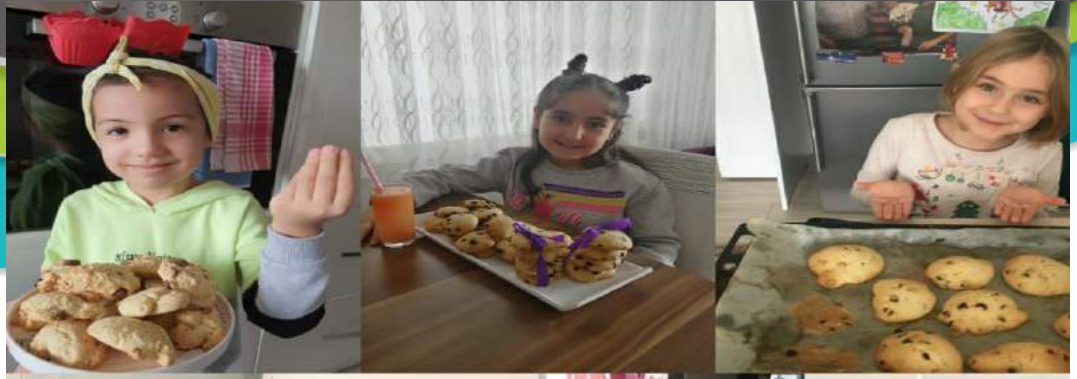
Shapes for kids

First graders practice the things that they learned in the class. Especially with real activies they repeat the topics. We try to do ceratin activities every day. First we tell them the steps , then ask for the rest. They feel more comfotable and confident when they know what to expect.

Teaching english to children are not as simple asit sounds. We use visual reminders including pictures, flash cards are helping for children who struggle with auditory processing.

First of all we increase the interest to our students .Numbers and colors are transformed into colorful laundry pegs to ensure permanent learning.



USPA

They learn the language naturally.

Cooking lessons; the first part of the lesson they learn the vocabulary for different ways of food preparation and ways cooking.

The last part of the lesson they show their food to their friends and teachers. After that when it is ready they sent the photographs to the teacher.

First graders practice classroom items. They coloured the school bag and school items. They repeat the items and enjoy with the colouring activity.

2nd GRADERS

First of all, hello everyone. Unfortunately, due to the coronavirus epidemic in the first term, we made our lessons mainly online. Although there were negativities, we managed to turn it into positive with our students.

What we did first term lets see:

1) ONLINE LESSONS
2) FACE TO FACE LESSONS
3) 10TH OF NOVEMBER
4) DISTANCE LEARNING
5) REGULAR INFORMATION SHARING
6) ONLINE GUIDANCE DAY
7) INTERACTIVE PAGES
8) NEW YEAR
9) EDUCATION IS EVERYWHERE

1)ONLINE LESSONS

We have held regular online classes since August. We have made learning English enjoyable with an activity that will increase the interest of our students in the lesson with much more materials than face-to-face education.

2)FACE TO FACE LESSONS

With the decision taken by our government, our students came to the school in groups and we decorated our lessons with many different activities in those days.

3)10th OF NOVEMBER

We held my 10th November commemoration with great respect. Each of our students gave information about Atatürk in English.

4.) DISTANCE LEARNING

On the days we did distance education, we spent time in entertainment as well as education. Danced to the online sleepover, sang songs in English.

KOLEJİ
OKULLARI

5)REGULAR INFORMATION SHARING

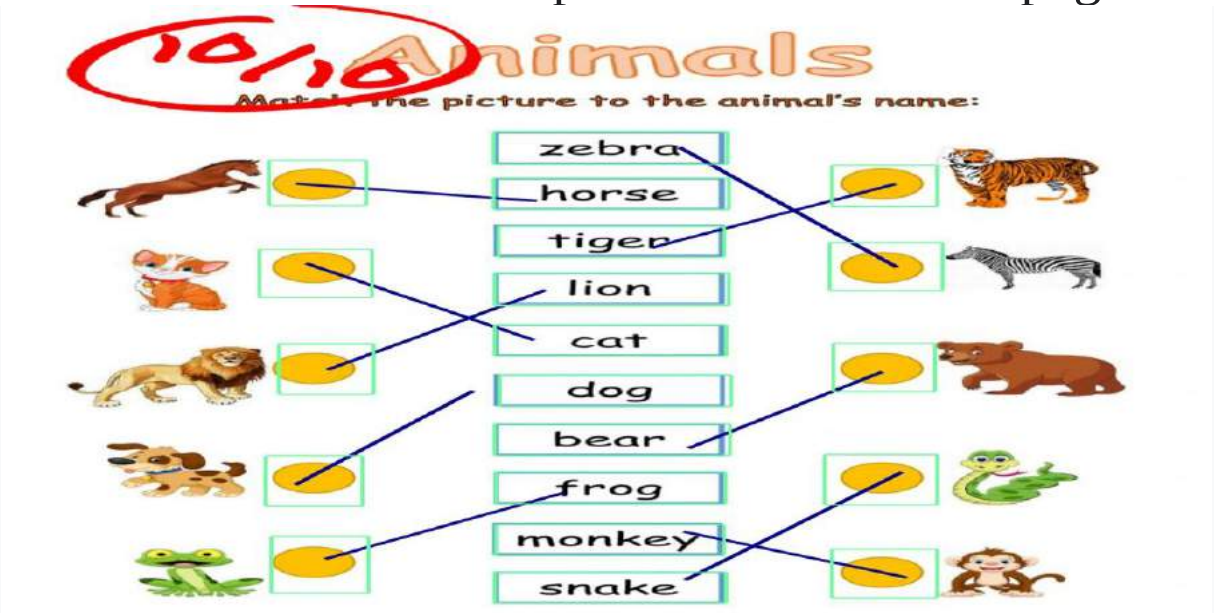
The information on the topic covered every week was presented to our parents in detail on Fridays. Video lecture videos were sent and our students prepared English videos on the weekends.

6)ONLINE GUIDANCE DAY

Organized online PDR night. How should the Online Education process be presented to our parents by the guidance unit of our school.

7)INTERACTIVE PAGES

In addition to our additional resource book, it was aimed to reinforce the topics with interactive pages.



8)HAPPY NEW YEAR

A special Covid calendar was prepared for our students for the new year.

9)EDUCATION IS EVERYWHERE

When our students came to school, our English education continued not only in the classroom but also in the cafeteria and service.

3rd GRADES

3rd graders started 1st term with full fun and joy but unfortunately we have had an unwanted situation and that was Covid-19 Pandemic but it didn't stopped 3rd graders from learning new things, our first term was mainly online, 3rd graders had a wonderful and great 1st term, they learned lots of new things by doing writing, reading, speaking and craft activities, even though we have experienced such an unwanted situation, we have accumulated good memories with our students and had a productive period.

1) ONLINE LESSONS
2) FACE TO FACE LESSONS
3) SPEAKING ENGLISH EVERYWHERE
4) ONLINE READING LESSONS
5) ONLINE QUIZZES, TESTS
6) ONLINE CRAFT ACTIVITIES
7) ONLINE PARENTS MEETING
8) ONLINE PYJAMAS PARTY
9) ONLINE COSTUME/NEW YEAR PARTY
10) ONLINE GAMES
11) HAPPY NEW YEAR WISHINGS/CARDS

1- Online Lessons:

To prevent the spread of Covid-19 virus the Turkish Government announced the closure of all educational institutions in March 2020, right after the announcement we as Kirsehir College started online lessons ant I can say that Private Kirsehir College was the first school to start online lessons in Turkey.

2- Face to Face lessons

Face to face learning is a really effective way to learn knowledge and skills because it often combines different ways of learning including writing, reading, listening, speaking, group work, and practice, So that's why right after online lessons, government of Turkey announced that students will go to schools in groups and will have face to face lessons but unfortunately it was for a short period of time. As always in Private Kirsehir College face to face lessons are full of different activities and games and our students are learning English with fun and joy.

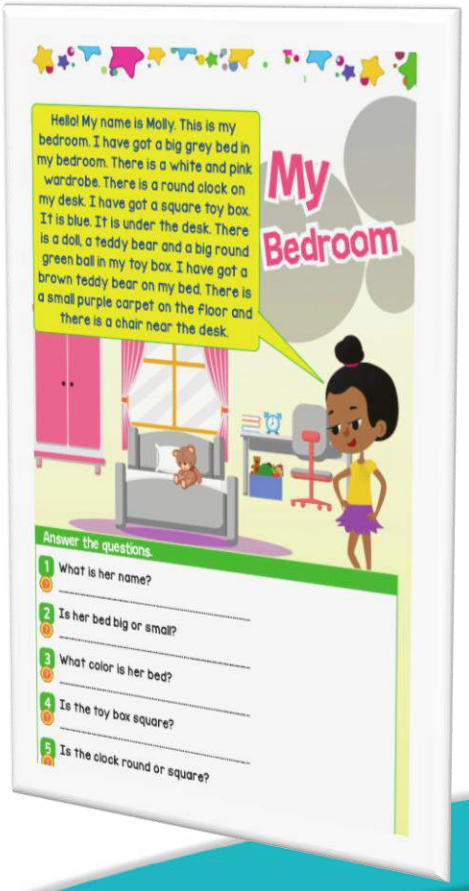
3- Speaking English everywhere

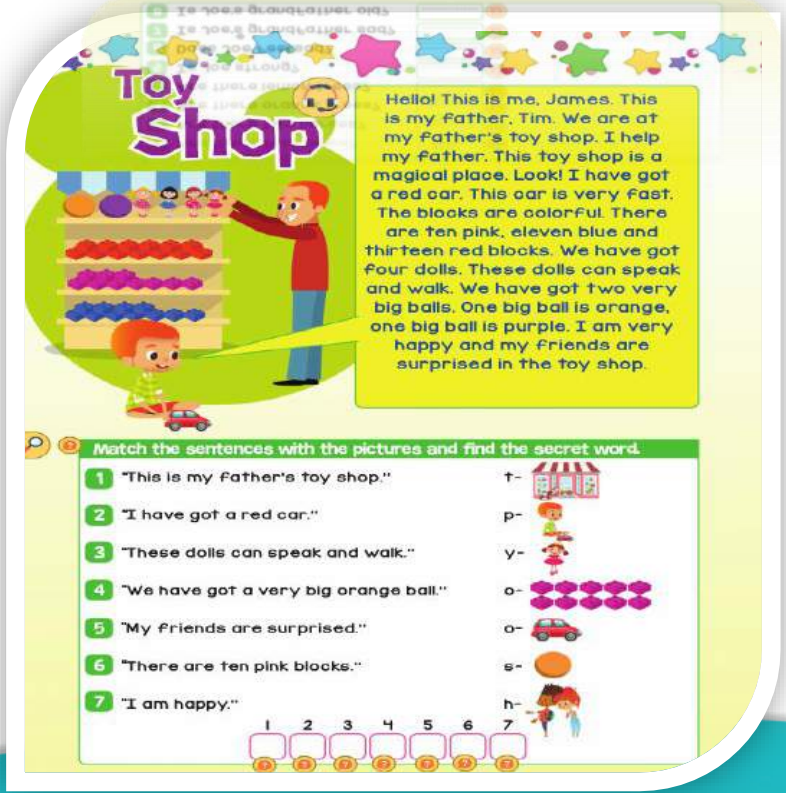
Speaking English is very important and it allows you to improve yourself and people around you it also allows you to broaden your world, learning English improve the quality of life, that's why 3rd graders were speaking English not just inside the classroom but while playing during break time, eating lunch and while leaving school.

4- Online Reading Lessons

Reading helps you to do better in all school subjects, it has been proven that book readers have a richer vocabulary, so for them easier to find the best expression for all that they want to tell others. In general, the more you read, the richer your vocabulary gets. Furthermore, books are definitely a treasure trove of knowledge! Therefore 3rd graders were having reading lesson every Wednesday and they read lots of new informative books in 1st term.

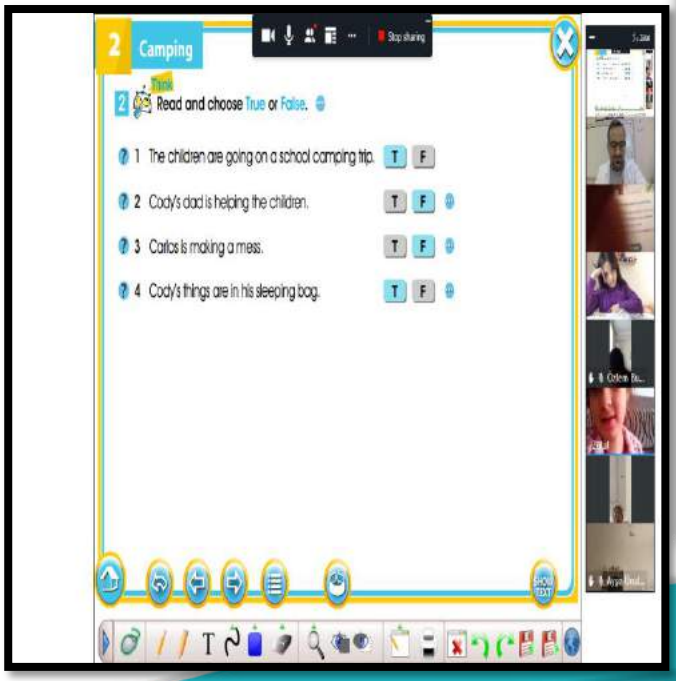
5-

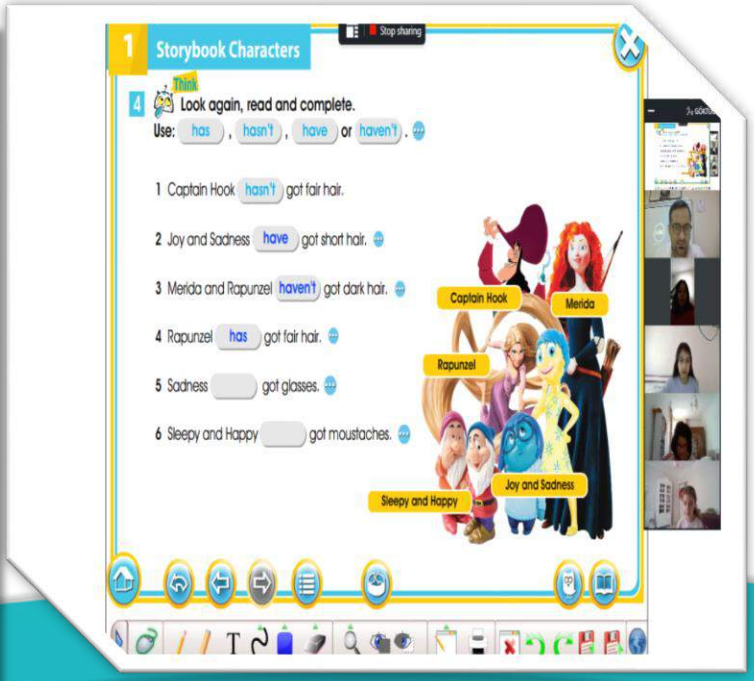




5 - Online Quizzes, Tests and Games:

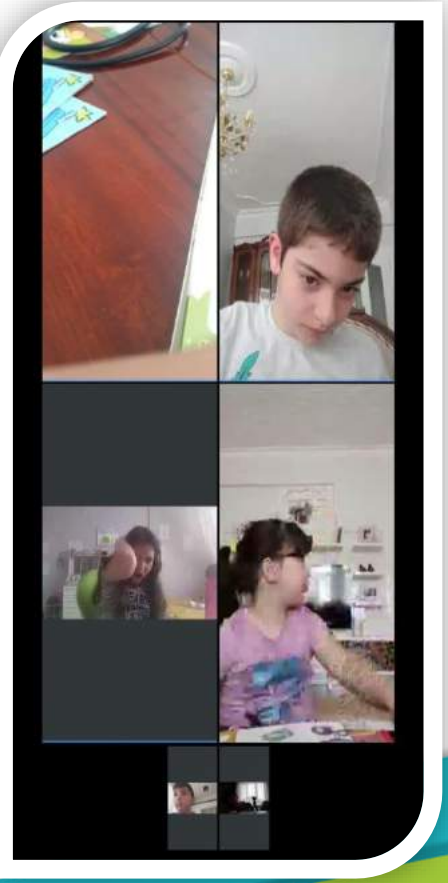
Tests and quizzes provide feedback to teachers and letting them know what is been learned and what is not. Frequent tests and quizzes encourage students to study. Having frequent quizzes and tests motivates study and reduces procrastination, Therefore 3rd grades English teacher were taking quizzes/tests at the end of every unit and 3rd graders played lots of games while having online lessons.

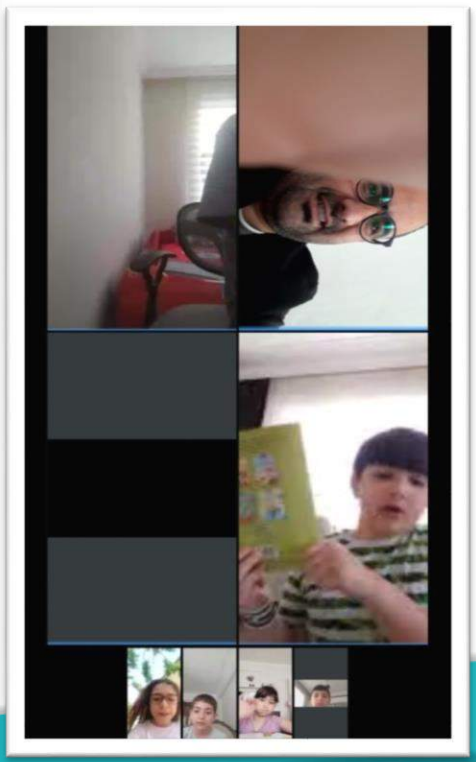




6- Online Craft Activities

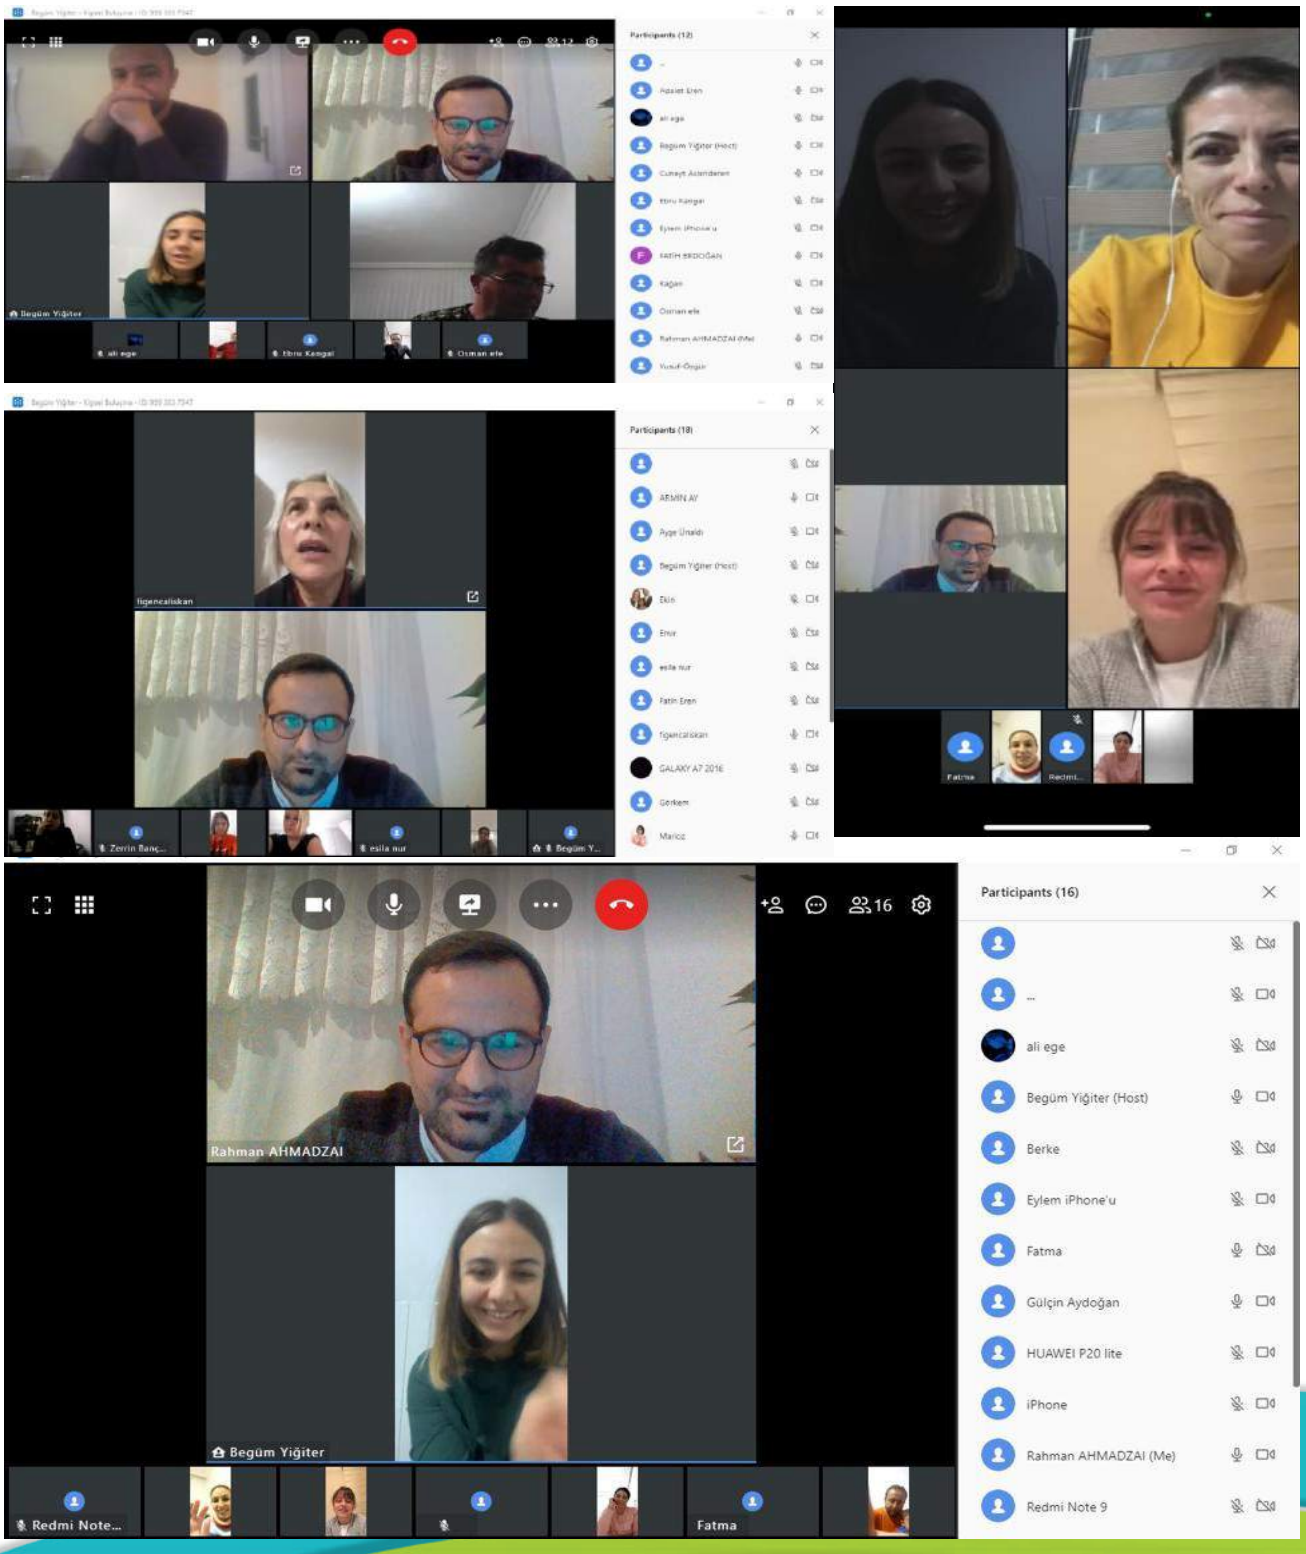
Crafts activities provide a platform for the children to create new things. It makes them think differently and to innovate. Short craft activities will make children more resourceful and versatile so in 1st term through craft activities 3rd graders have learned lots of new spoken phrases and creativities.





7- Online Parents Meeting:

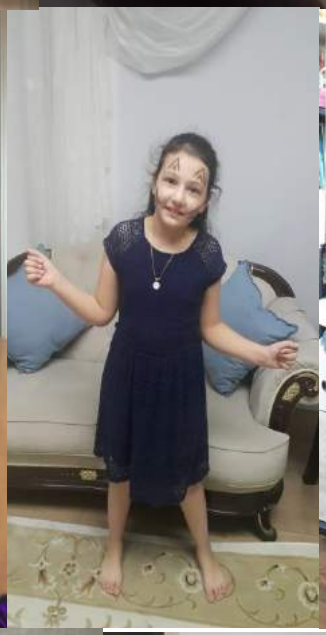
Parents-Teacher meeting is an effective way for parents and teachers to interact and discuss about their child's progress. Parents on the other hand can play an active role in their child's education and can further encourage and influence their child to do well in school. Therefore we have had online meetings with 3rd grader's parents.

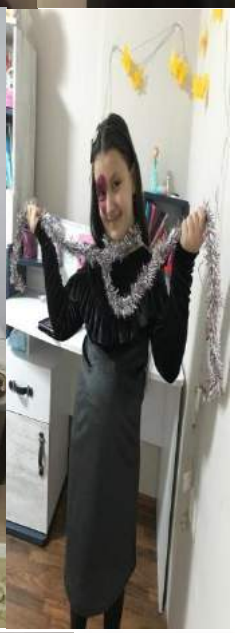


8- Online Pajamas Party:

Parties can give children real benefits as it opens up a world of imagination and excitement, parties are very helpful for those children that tend to be quite shy. Children are always more likely to build confidence whilst doing something fun, new and exciting, so therefore with the help of our school principal Mrs.Ayse Baltaci, we have had lots of online parties.

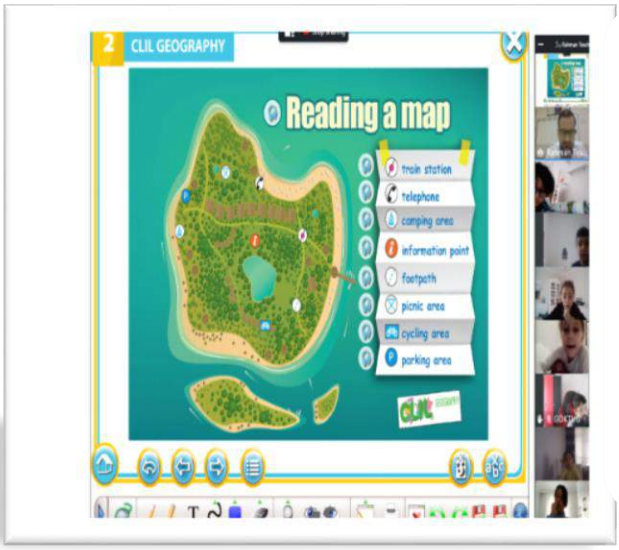
9- Online Costume/New Year Party

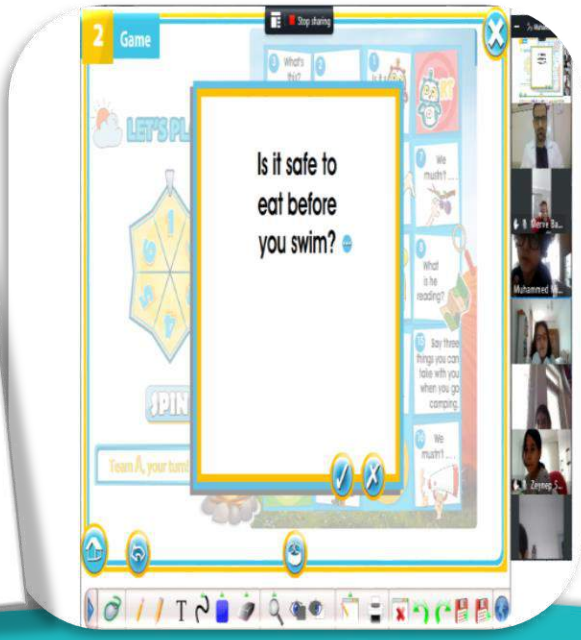




10- Online Games:

Games keep children active and can boost their physical stamina and fitness, games help students to make and sustain the effort of learning. Games provide language practice in various skills- like speaking, writing, listening and reading. They encourage students to interact and communicate. They create a meaningful context for language use, 3rd graders played lots beneficial online games in 1st term in every English lesson.





11- Happy New Year Wishings/Cards

DEAR METE
I HOPE THAT THE NEW YEAR WILL BE THE BEST YEAR OF YOUR LIFE. MAY ALL YOUR DREAMS COME TRUE AND ALL YOUR HOPES BE FULFILLED!

4TH GRADES

In 2020-2021 Academic Year we, as 4th grades, have had a wonderful term with lots of language activities, games, crafts and lots of enjoyable and educational activities.

These are:

1. *CLASS DOJO*
2. *READING SKILLS WITH SCHOLASTIC LITERACY PRO APPLICATION*
3. *VOCABULARY ACTIVITIES WITH DICTIONARY*
4. *WRITING ACTIVITIES WITH DIARIES*
5. *SPEAKING ACTIVITIES WITH ROLE PLAYS*
6. *GRAMMAR ACTIVITIES WITH INTERACTIVE NOTEBOOK*
7. *COLLEGE HOMEWORK*
8. *QUIZZES AND TESTS*
9. *ARTS AND CRAFT*
10. *ONLINE LESSONS*
11. *ONLINE GAMES*
12. *ENGLISH CORNERS*
13. *ONLINE PYJAMAS PARTY*
14. *NEW YEAR CARDS, SELFIES AND COSTUME PARTY*

1. CLASS DOJO

What is Class Dojo?

ClassDojo's mission is to reinvent classrooms by bringing teachers and students closer . Teachers use ClassDojo as a platform to encourage and engage the students. Classrooms become more positive places . Each 3rd grade has an avatar, he/she gets pluses from homework, speaking English and good manners. Stdents can change avatars when they reach multiples of 50.

All the students had a class dojo classroom job such as;

Textbook assistant

computer assistant

board eraser,

calendar leader

teacher's assistant

2. READING SKILLS WITH SCHOLASTIC LITERACY PRO

In English Language Learning, Reading is one of the best ways to increase vocabulary and to consolidate one's understanding of grammar. Not only can you come across many new words and phrases in context, you'll also see grammatical structures laid out on the page that you may have heard in conversation but not quite yet worked out.

Therefore every week we, 4th grades, read English readers from Scholastic Literacy Pro Library Application. We can hear the pronounciation and read at the same time. By this way we can correct our pronunciation mistakes. After reading books we take the quizzes about the books. With quizzes we aim to improve the students' reading and comprehending skills.. As we read together our imagination develops. Students visualize how a character is feeling and therefore learn empathy.

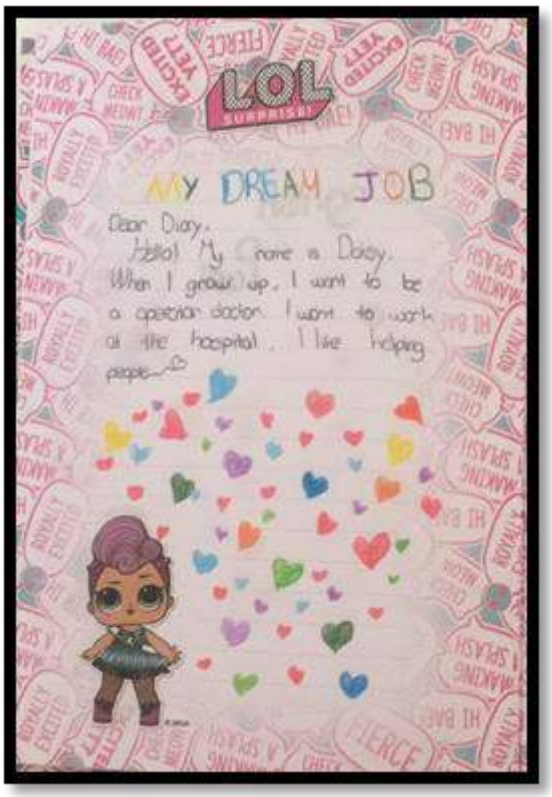
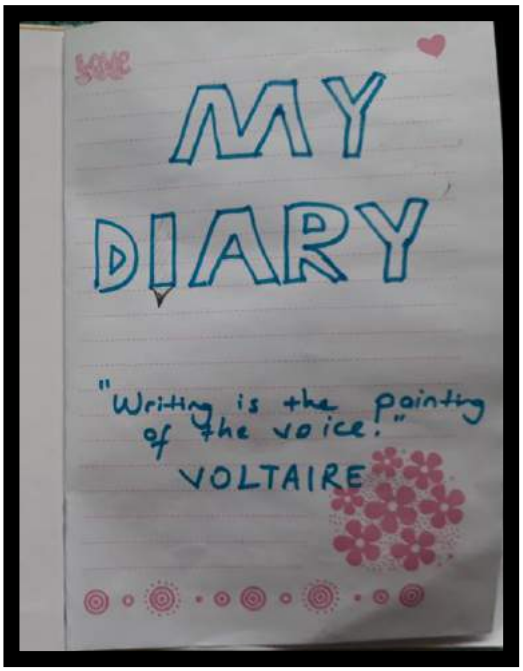
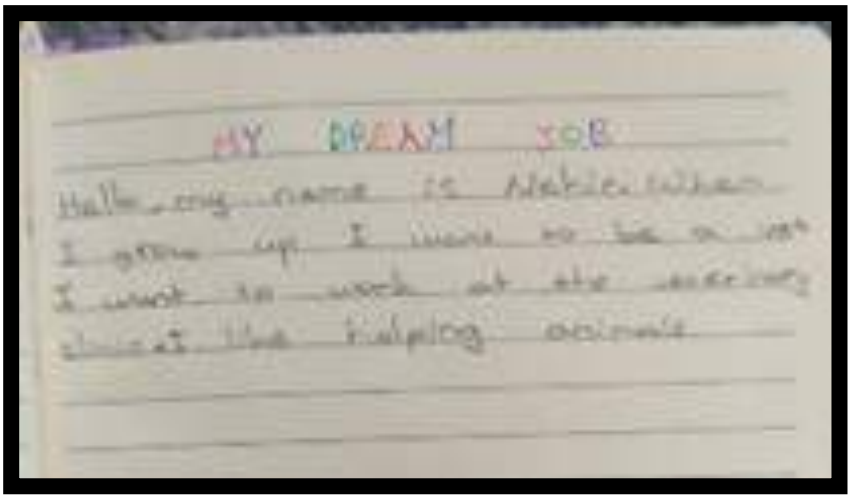
3. WRITING ACTIVITIES WITH DIARIES

To reinforce writing skills we, as 3rd grades, kepp diaries. We are writing on general topics such as: M y best friend, My favourite cartoon character...etc. By keeping diaries not only did their writing skills improve, but also their spelling mistakes decreased.







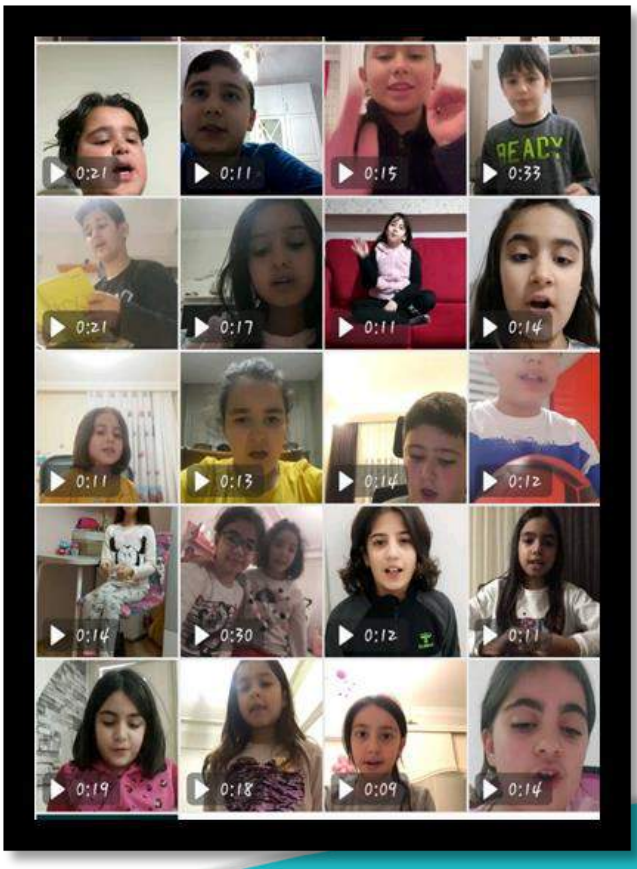
4. VOCABULARY ACTIVITIES WITH DICTIONARY

Vocabulary represents one of most important skills necessary for teaching and learning a foreign language. It is the basis for the development of all the other skills: reading comprehension, listening comprehension, speaking, writing, spelling and pronunciation. Vocabulary is the main tool for the students in their attempt to use English effectively.

Therefore we started vocabulary studies with 4th graders. They checked the meaning and pronounciation of the key words, wrote down on their notebooks. Using these key words in sentences and in games enabled students remember them easily.

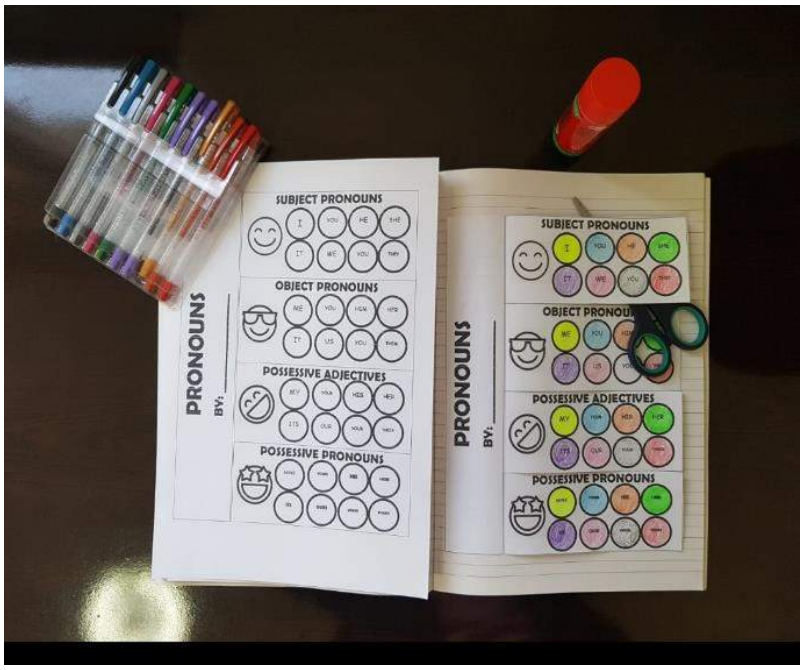
5. SPEAKING ACTIVITIES WITH ROLE PLAY

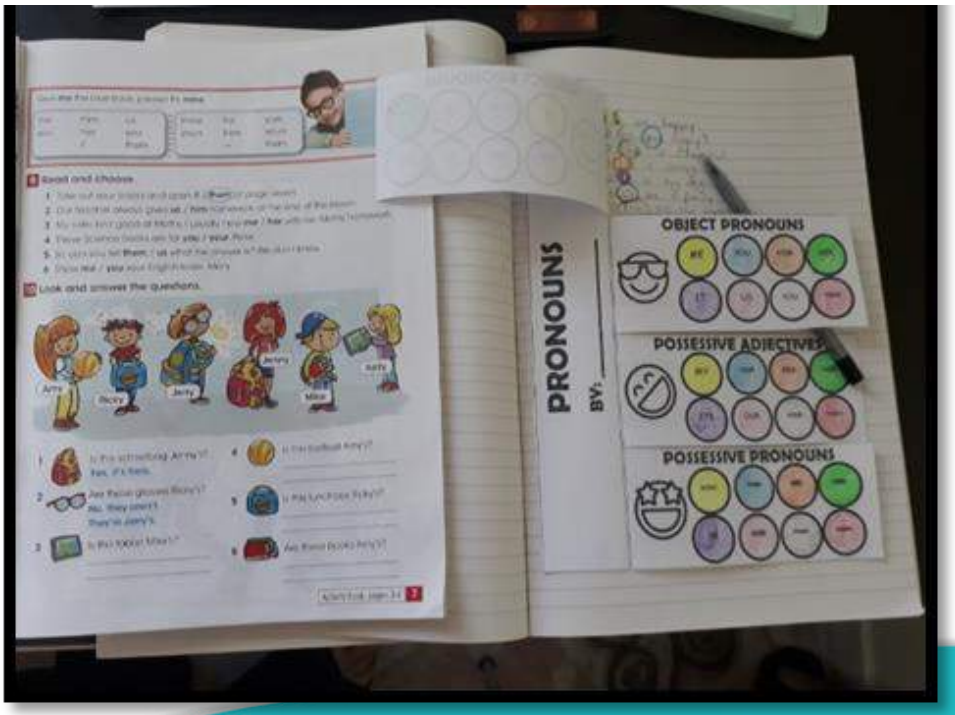
Foreign language learning best occurs through speaking interaction, Therefore we provide our students with the opportunities to communicate in English on online lessons and as part of their homework. We 4th graders have had many role plays and presentations to promote oral fluency.



6. INTERACTIVE GRAMMAR NOTEBOOKS

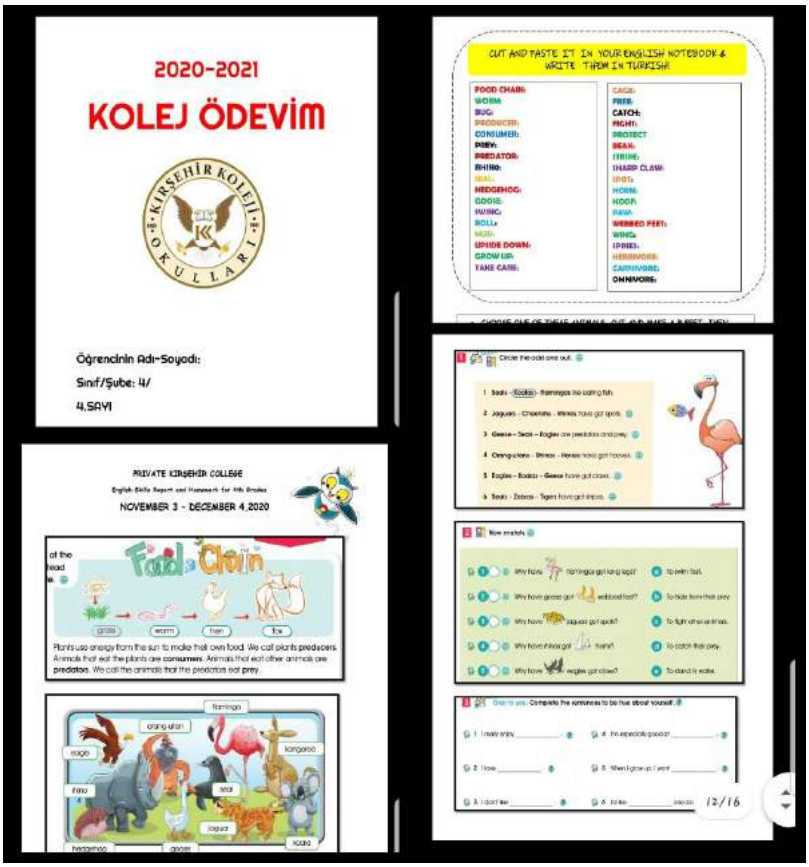
Interactive notetaking is the best way to get and use information for the students. It is actvive learning because it helps students understand what is important in atext and allows them to represent what is important in their own way. To engage students in writing we 4th graders learn grammar points with interactive notes. We cut and paste notes, sheets, foldables and flaps… Writing is so fun..





7. COLLEGE HOMEWORK

We sent the daily homework and COLLEGE HOMEWORK once in two weeks through K12 and WHATSAPP applications. Students did and sent back their homework by these applications . The teacher checked and corrected the mistakes. With this close follow-up distance lessons were really successful..

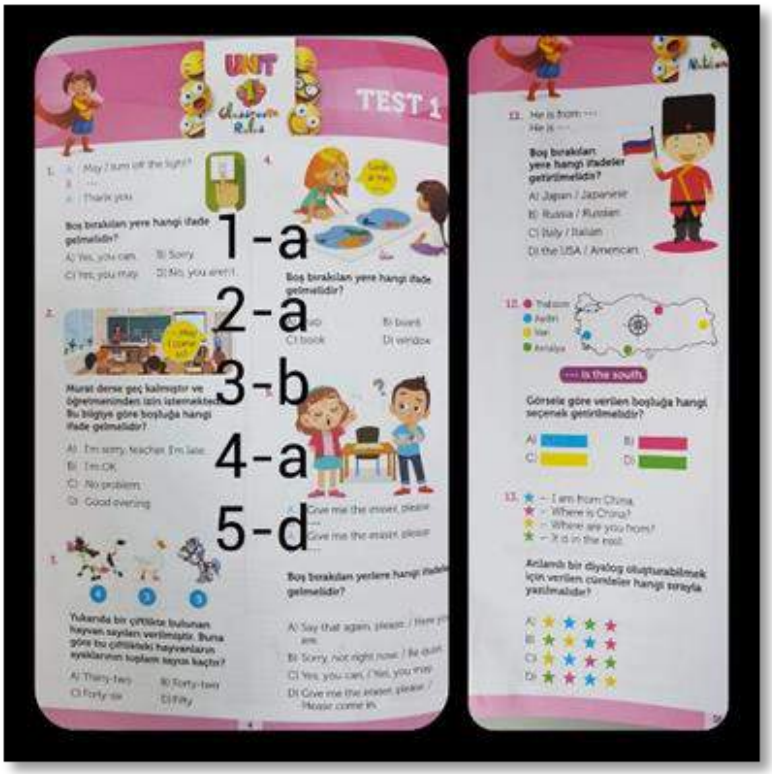


8. QUIZZES AND TESTS

During online lessons, to succeed better in general school tests 4th grades had online quiz every week and got their scores.

Awesome 4th grades were really successful in their quizzes.

Congratulations to all of them.



9. ARTS AND CRAFTS

There are numerous benefits of arts and craft projects. They engage kids and nurture their creativity. Most arts and craft projects involve moving the hands and fingers. These movements involve fine motor skills and improve the overall muscle strength and control over movements. The more the children practice, the better their hand-eye coordination.

Moreover art and craft activities create a sense of achievement inside kids and give a boost to their self-esteem.. Therefore arts and crafts help in the physical and social development of kids.

These are wonderful 4th graders' arts and crafts….

10. ONLINE LESSONS AFTER NOVEMBER 23, COVID-19 PANDEMY

On November 23, Turkey announced that all educational facilities from primary schools to universities would be shut again so the virus can be prevented.

Since that time We, Kırşehir College, have started online lessons with "DISTANCE LEARNING, CLOSE FOLLOW-UP" motto.

For English speaking interaction we,4th grades, had online lessons 10 hours in a week.

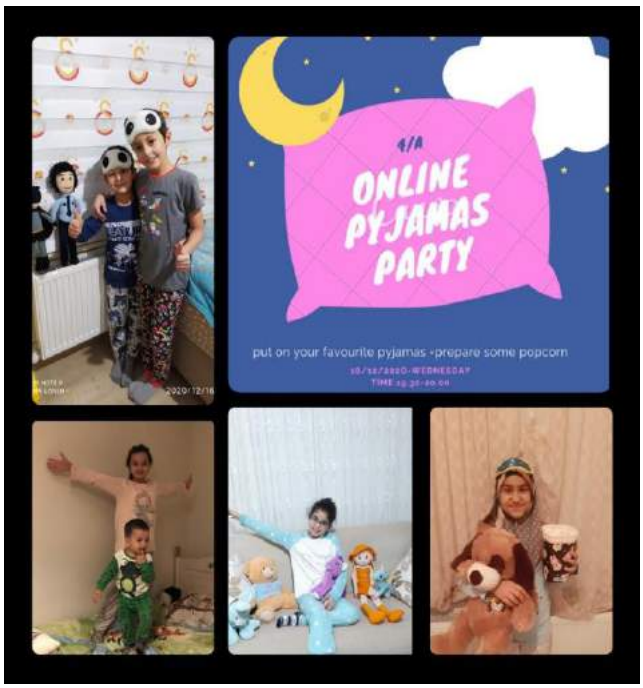
12. ONLINE PYJAMAS PARTY

One of the disadvantages of online lessons is students sitting in front of a screen for a very long time. Decrease in motion makes online lessons dull and less engaging for students. To prevent this We 4th graders had an online pyjamas party. We put on our favourite pyjamas, prepared popcorns, danced and enjoyed a lot.



13. NEW YEAR CARDS, SELFIES AND COSTUME PARTY

For the new year 4th graders designed new year cards and sent new year messages to their friends and loved ones. We also had new year selfie crafts.

Moreover On 30th December 2020 we had an online New Year celebration and a costume party. They put on their costumes and described them. We ate, danced and enjoyed a lot..

5 TH GRADERS

First of all, hello everyone. Unfortunately, due to the coronavirus epidemic in the first term, we made our lessons mainly online. Although there were negativities, we managed to turn it into positive with our students.

What we did first term lets see:

1.) Our students learnt many different topics regarding to our Schedule.

2.) Our students had 4 skills during online lessons speaking , reading, listening, writing.

3.) Our students had Reading Club every week. They read different books from Scholastic online platform and they did quiz according to that book.

4.) Our students had Speaking Club every week.We did speaking club at the school and we did online lessons.Every week they had different topics to talk.

5.) We played a lot of game during online lessons and face to face lesssons.

6.) We had a advising hour with our students. What did we do that week and gave information about the next week's program.

7.) We held a chat meeting with our parents. We shared information about our students.

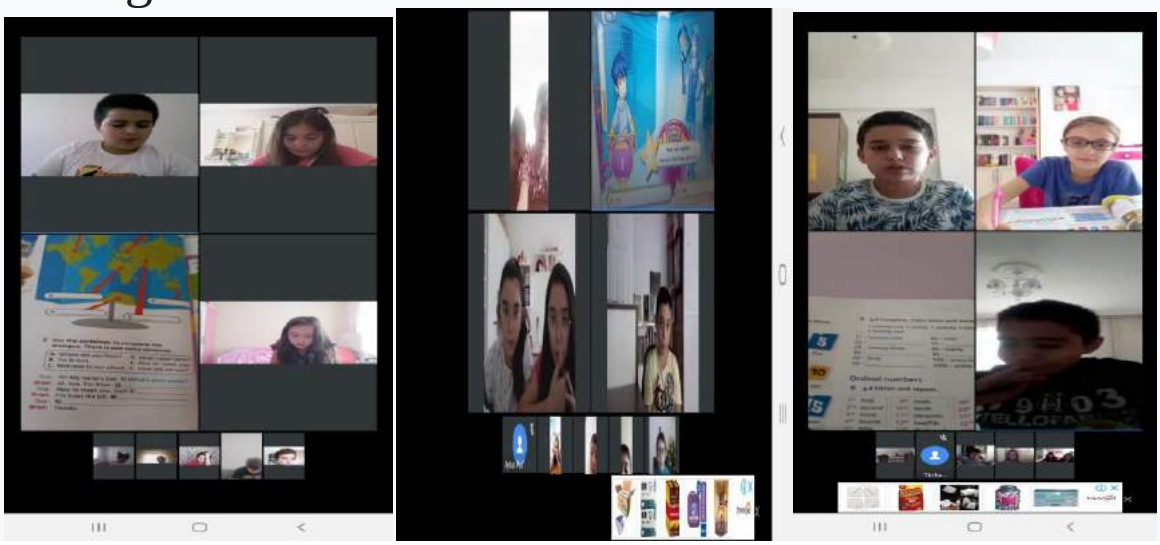
8.) We gave quizzes and trial exams to our students every week. So to determine if there are any missing issues.

9.) We checked the college agendas regularly every week so that we could follow the assignments of our 5th grade students more easily.

10.) We prepared Christmas greeting cards with our students and our students gave presentations in our lesson.

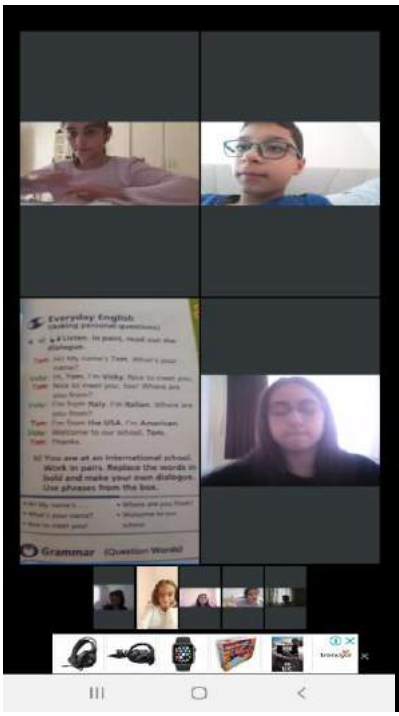
Our students learnt many different topics regarding to our Schedule.

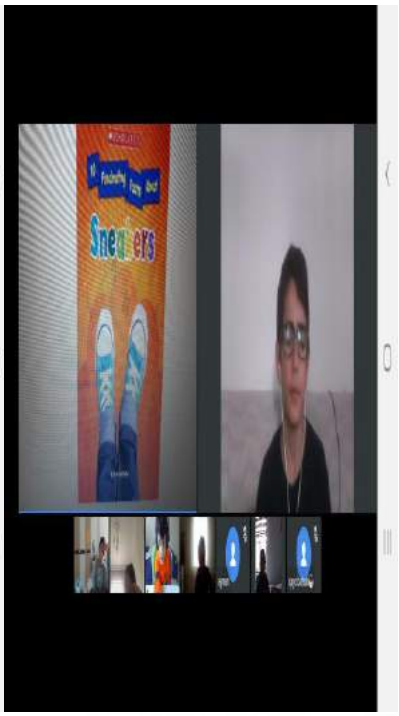
We learned many subjects regarding to our schedule in our English lessons. Our students had 4 skills during online lessons speaking , reading, litening, writing.



Our students had Reading Club every week.

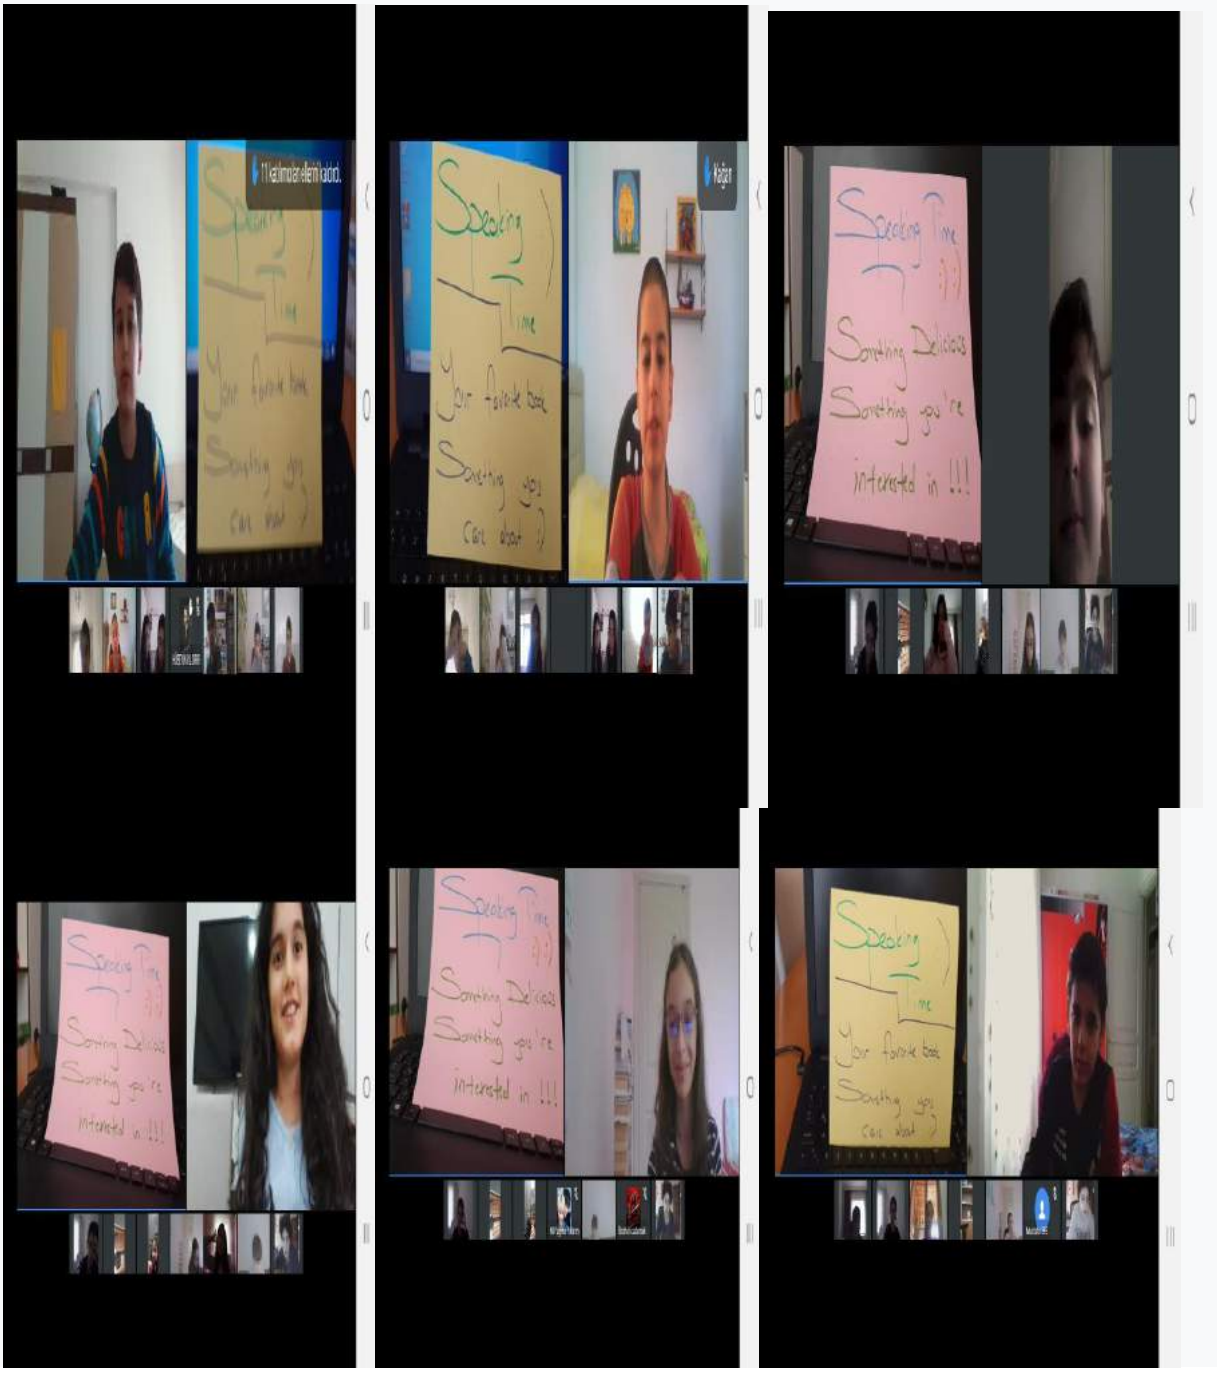
They read different books from Scholastic online platform. They read the book and did quiz according to that book which we read. They had the opportunity to reinforce the topics and words we learned in the lesson in the books we read.





Our students had Speaking Club every week

Sometimes we did speaking club at the school sometimes we did speaking club online lessons. Every week they had different topics to talk. Our students showed their skills in the speaking lesson by preparing in advance about two different subjects which I gave them before.

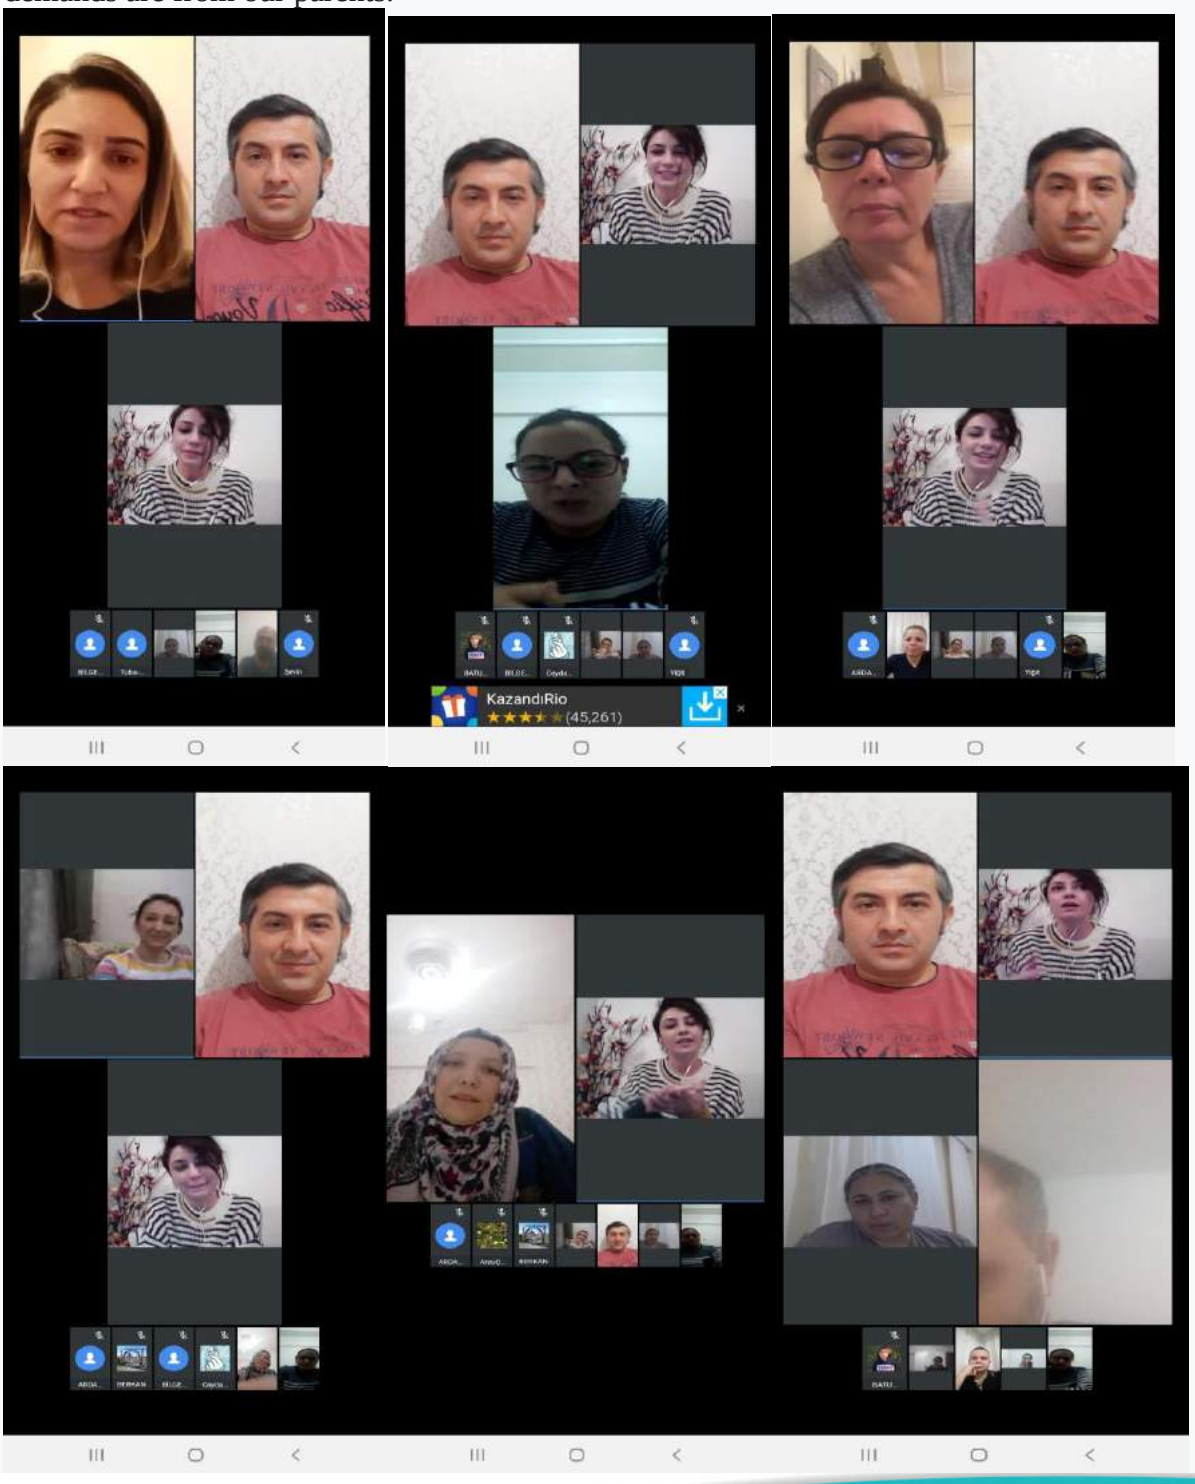


We had a guidance hour with our students.

We had a advising hour with our students one day each week. What we did that week we talked about it in our advising hour, we made the plan and information for the next week.

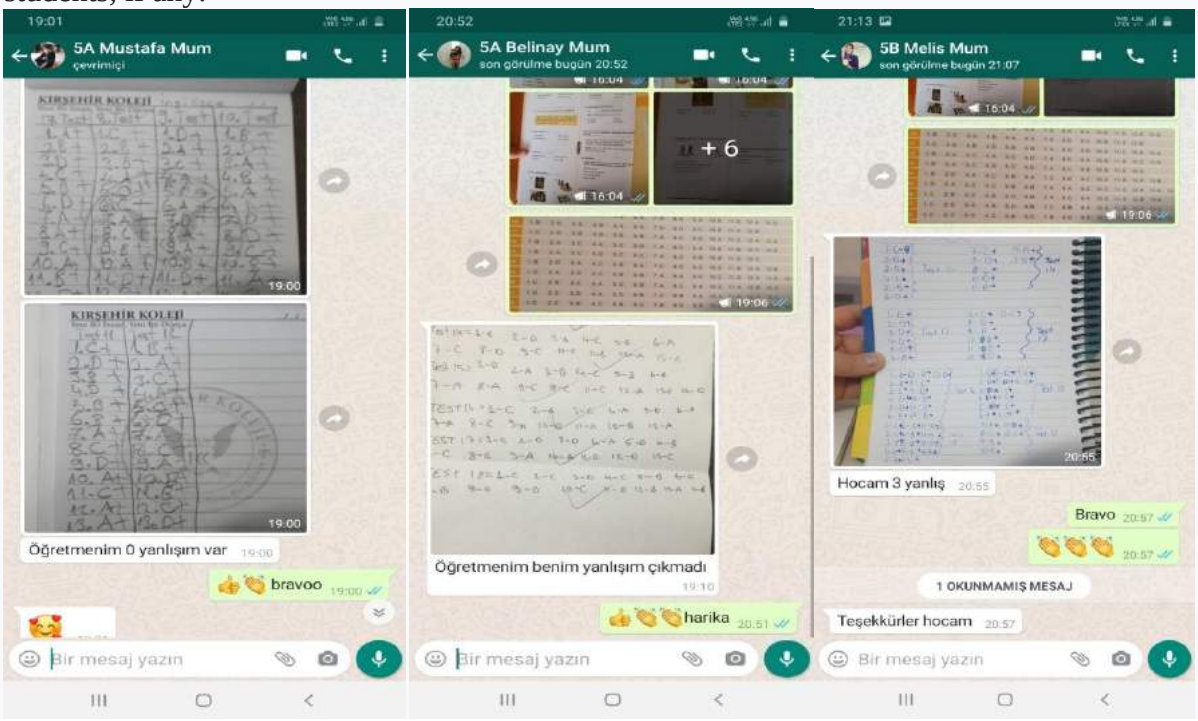
We held a chat meeting with our parents

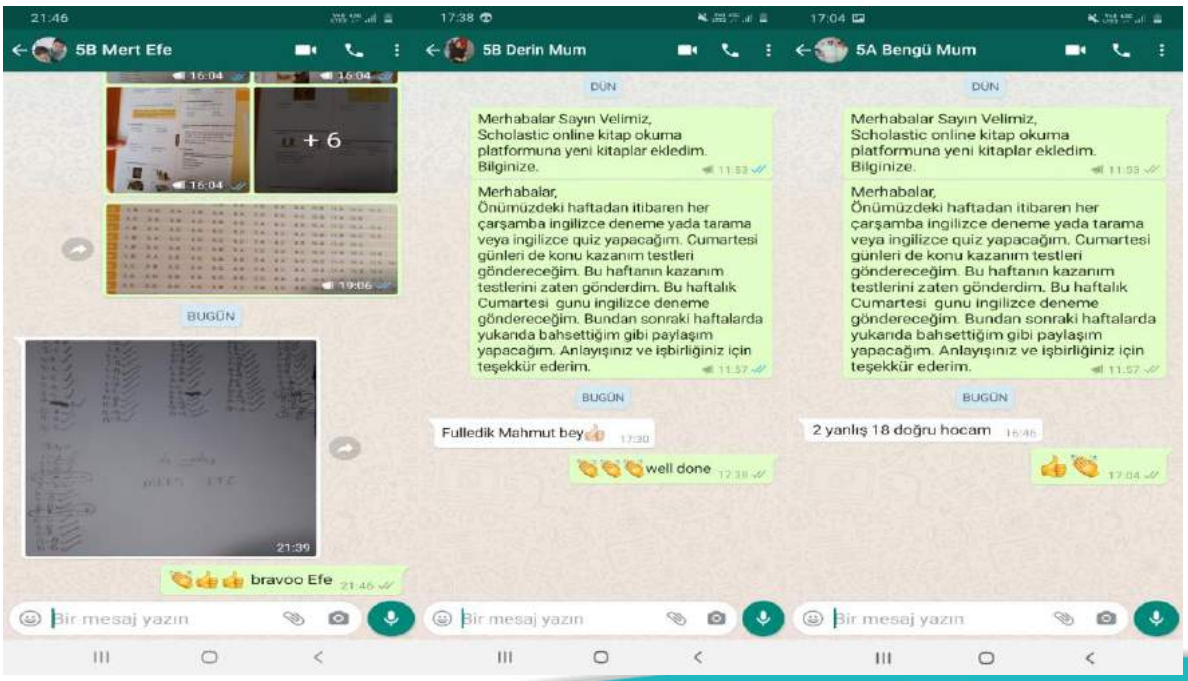
We exchanged information frequently with our parents to inform our students about the general situation. We exchanged information about what our parents expect from us, what our demands are from our parents.



We gave quizzes and trial exams to our students every week

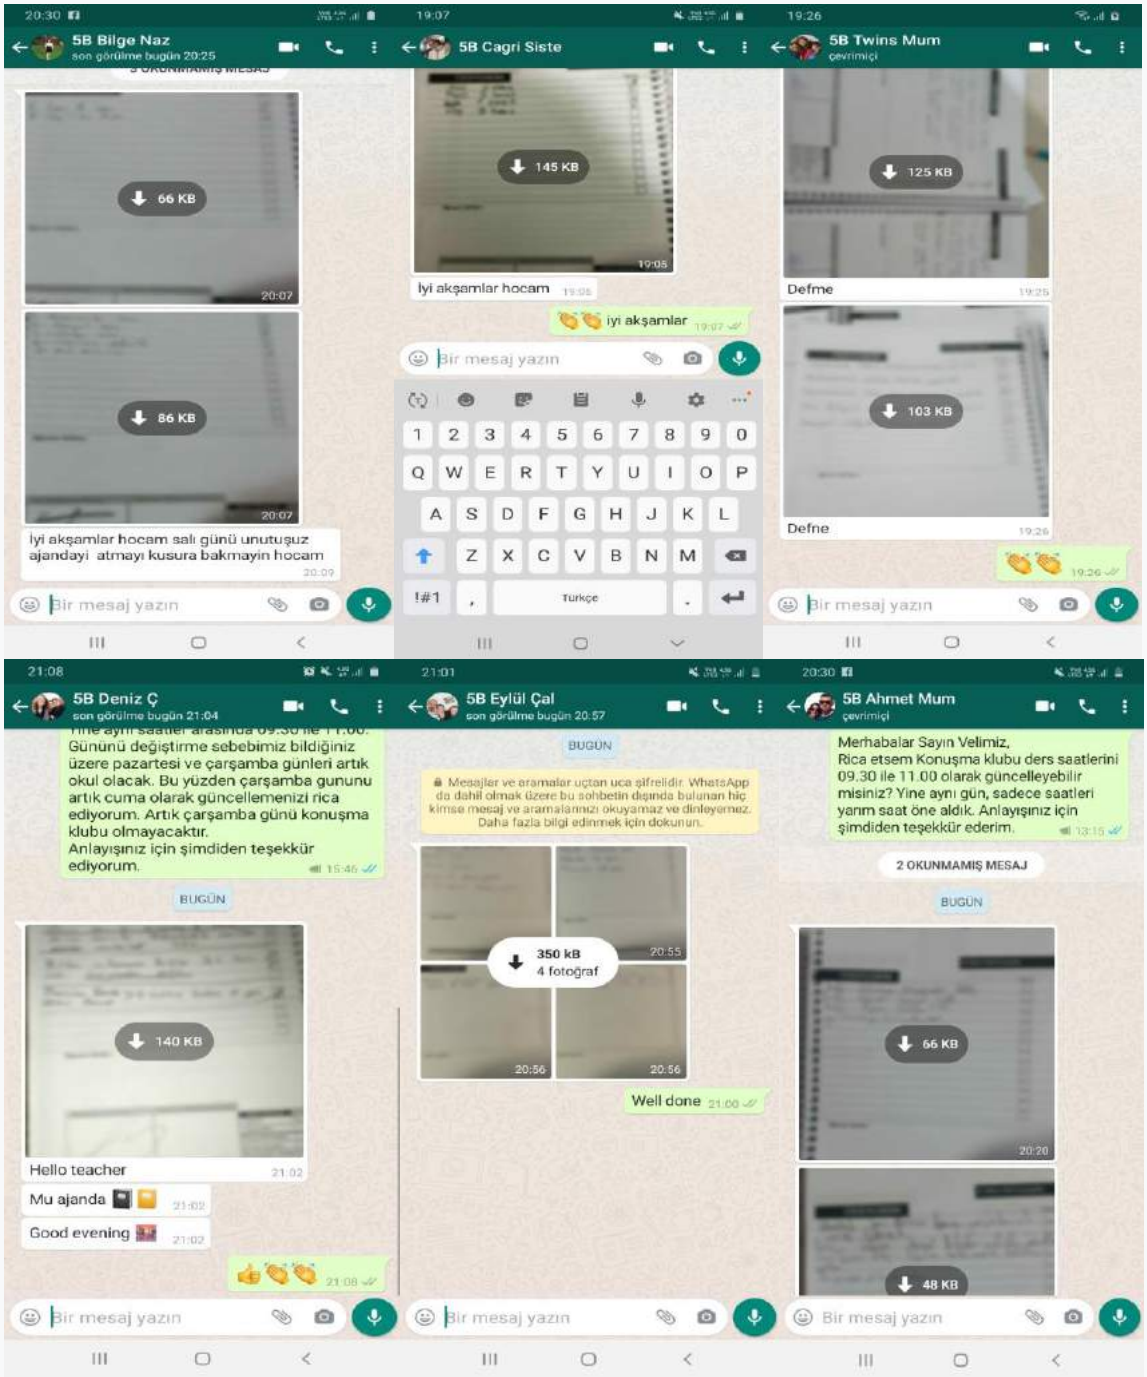
So to determine if there are any missing issues. We regularly applied trial exams to our students every week, we made acquisition tests, so we could fix the deficiencies of our students, if any.





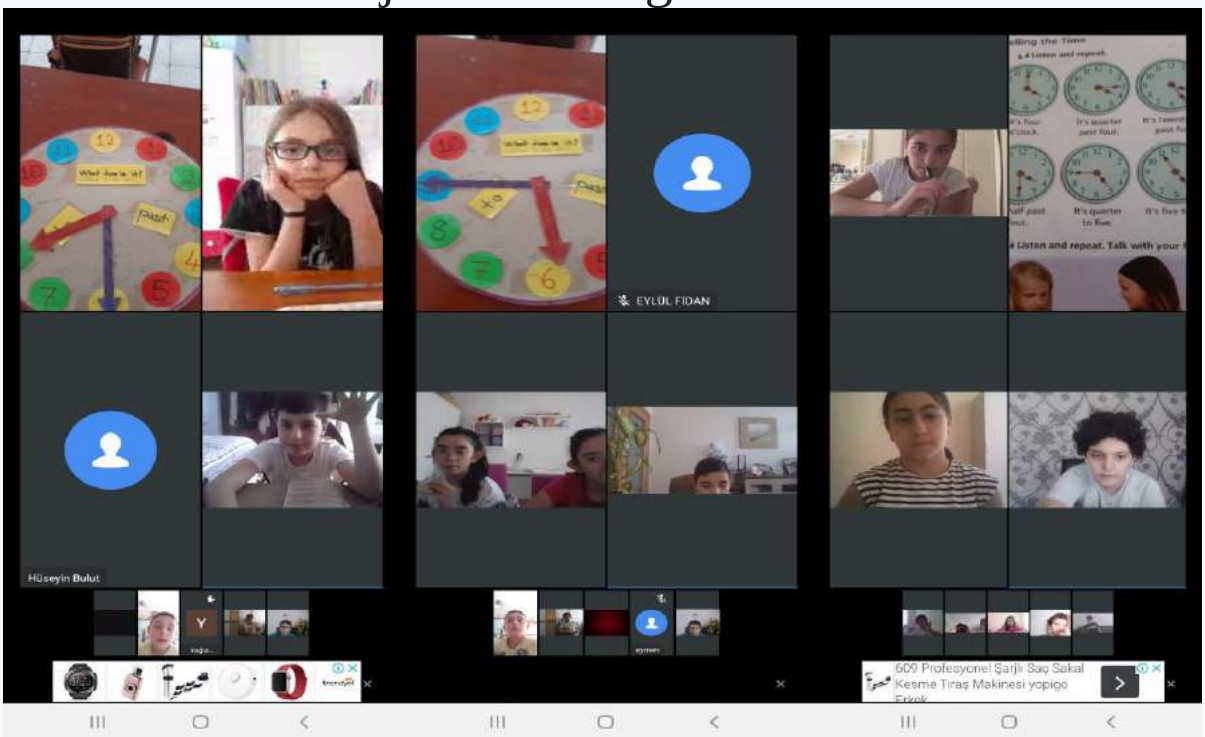
We checked the college agendas regularly.

We checked the college agendas regularly every week so that we could follow the homeworks and assignments of our 5th grade students more easily.



We played a lot of game during online lessons and face to face lesssons.

We played many different games and organized activities with our 5th grade students in order to reinforce the subjects we taught in lessons.



We prepared Christmas greeting cards with our students.

Our 5th grade students designed a card for a person they wanted for the new year talked about their expectations and wishes for the new year.

Our students had 4 skills during online lessons

We had our lessons on speaking, writing, reading and listening skills in our 5th grade in English lessons.

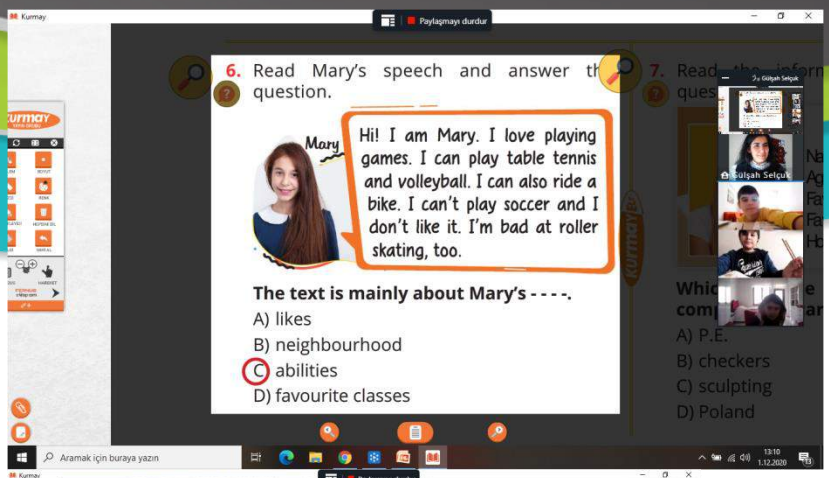
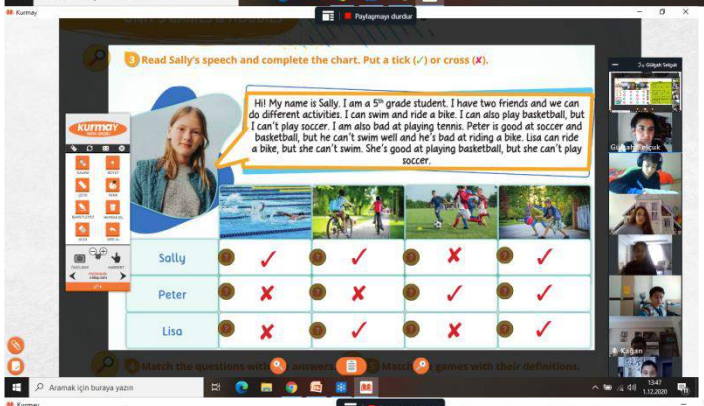
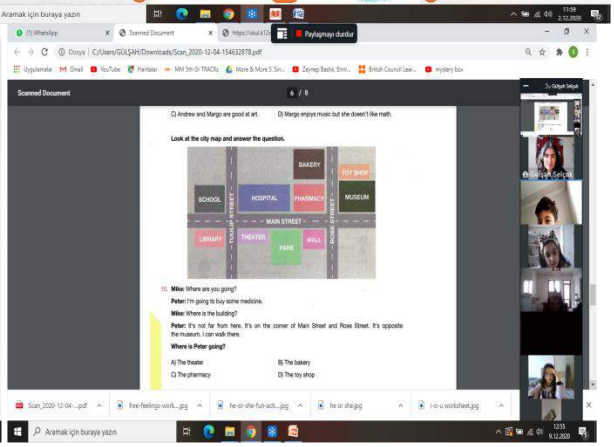
In the English Language Support Programme, courses are taught in accordance with a syllabus targeting reading-writing and listening-speaking skills. In order to reach the learning objectives, course videos and mateirals prepared based on the course content are shared with the students.

Gülşah Selçuk

.

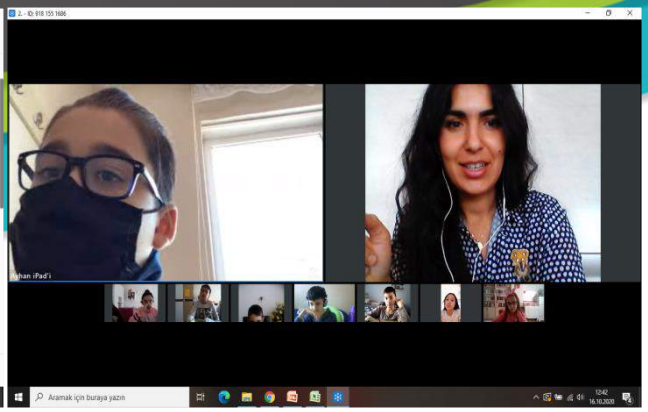






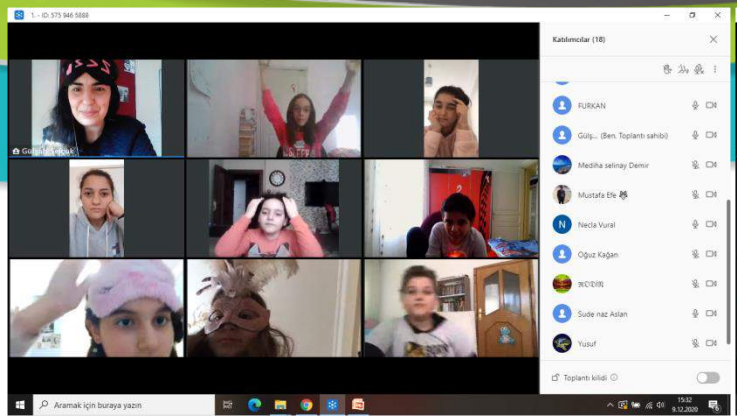
It is very important to discover how to teach more effective in the online lessons. You may not be able to see your students' reactions as clearly as in a face-to-face classroom to see if they can understand what you're saying. Becuase of that, teaching online to young learners was very difficult.

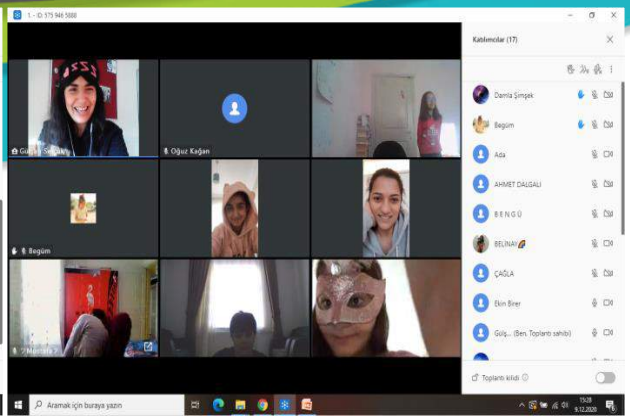
Gülşah Selçuk

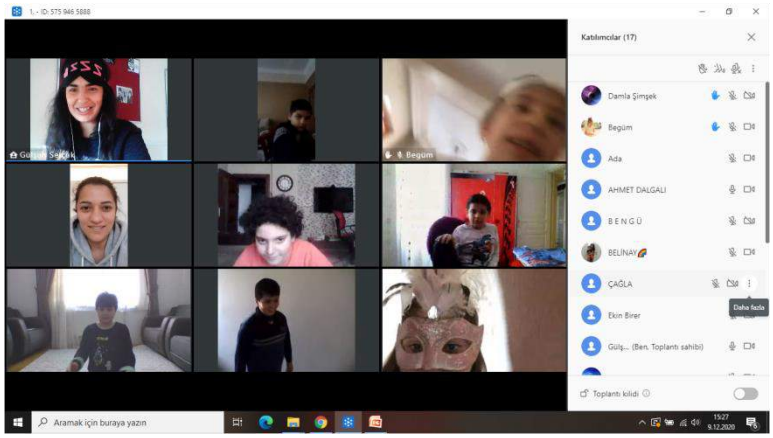


I don’t try to fit too much into each lesson. I have one clear aim and keep my lesson as simple as possible! I think about short activities that vary in pace to help you reach that aim. I use time-efficient feedback methods. I plan how I will give feedback and check answers during the lesson.

Gülşah Selçuk

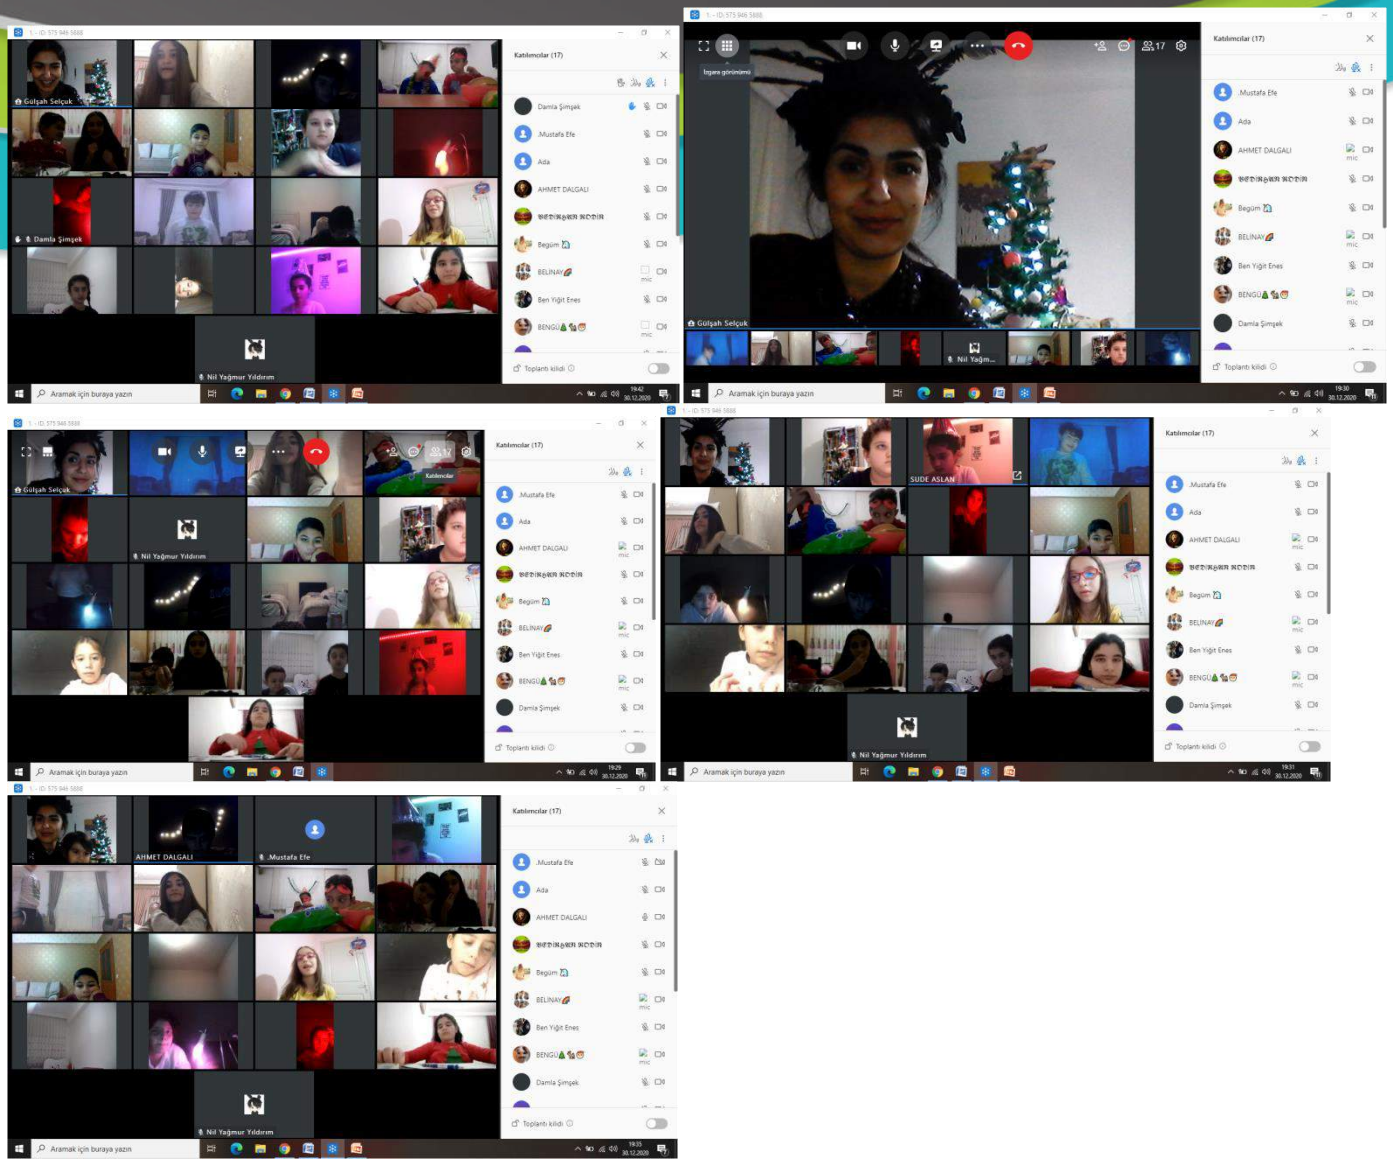






When the students loose their attention, I try to think about effective activities that take their attention. Especially, I give them a physical task and so ı get them attention back. Pyjama party is one of them. They gave their energy and attention so they gain their loosing interest.

Gülşah Selçuk



On the 30th of December, we had a new year part with 5A. They were very excited. At the party, they danced and showed their talents to their friends and to me. Their family also participated in the party. Some of them were with their sisters or brothers, and some of them were with their parents. They took all their stres away.

Gülşah Selçuk

Online cooking lesson was very interesting for us. Before the lesson, I send them the video, they watched before we get started. They prepared the ingredients. We started to cook it step by step. I gave the direction and then they applied. At the end, all of them were happy and proud of theirselves. We ate our dinner together in the online lesson. It was very delicious and enjoyable lesson.

Gülşah Selçuk

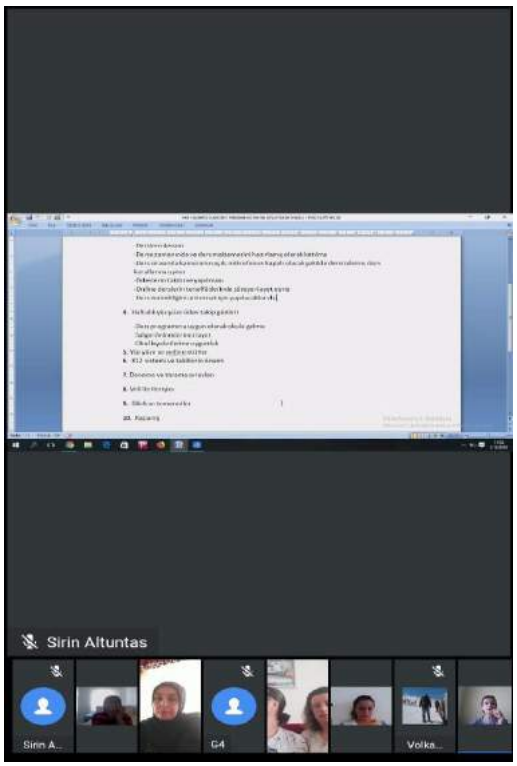
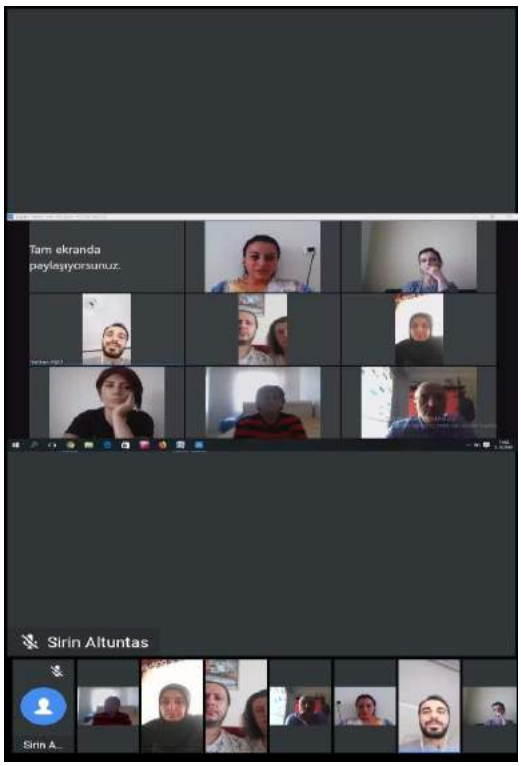
ONLINE PARENTS MEETING:

We organized an online meeting with 6th grade parents.We talked about the process and wished good things for this year.



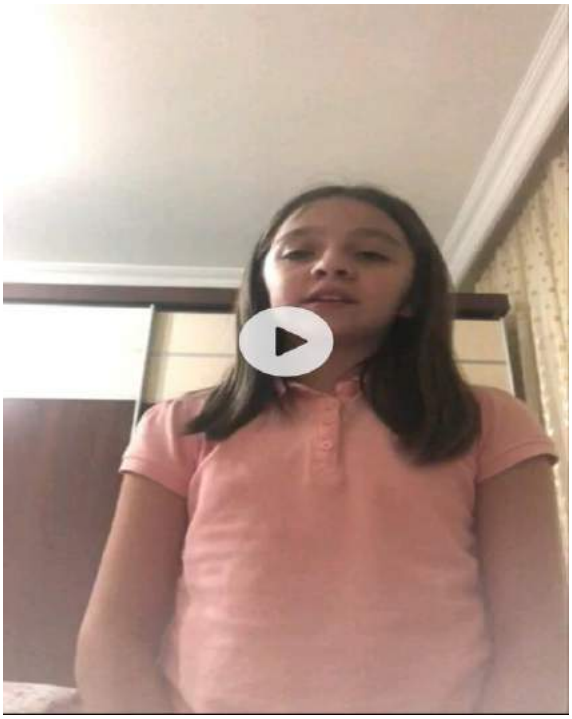


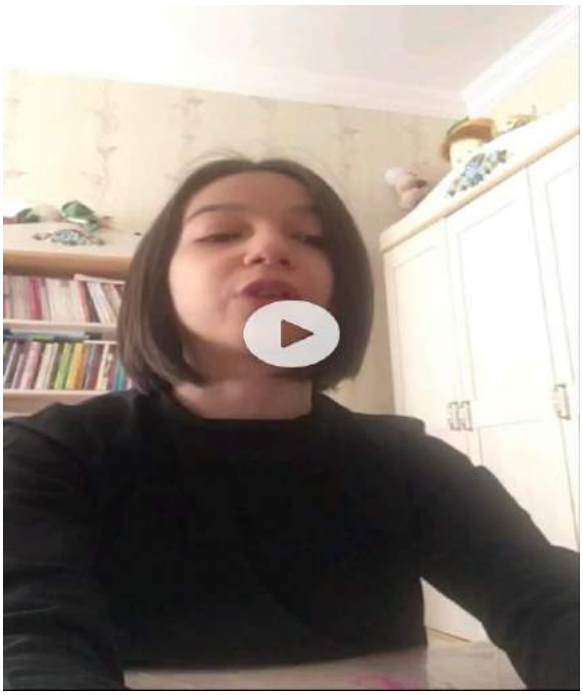
HAVING A PICNIC WITH 6A AT GÜZLER PARK:

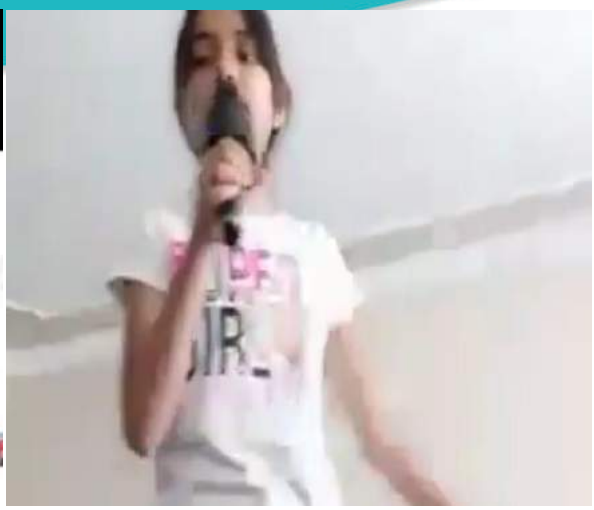
IN THE BEGINNING OF THE YEAR WE VISITED GÜZLER PARK, HAD BREAKFAST AND HAD SO MUCH FUN.

SINGING A SONG AT HOME: MEMORIES BRING BACK MEMORIES:

WE SANG SONGS AT HOME TO IMPROVE OUR PRONOUNCIATION AND SENT VIDEOS.







SPIDER WEB GAME

Game-Based Learning plays important role in teaching by making students to collaborate, communicate, interact and work in teams. Strategic games improve the functioning of brain. Gaming creates a dynamic that can inspire learners to develop skills and build an emotional connection to learning and subject matter.For this aim, we often play games.In Spider Web game we make short conversations to improve our speaking skills and we play Word Hunt game to improve our vocabulary skills.

WORD HUNT GAME

BAKING “COOKIES WITH DRIED FRUITS” WITH 6A

WE BAKED SOME COOKIES AND LEARNT ABOUT SOME FOOD AND LEARNT HOW TO GIVE A RECIPE OF A COOKIE.

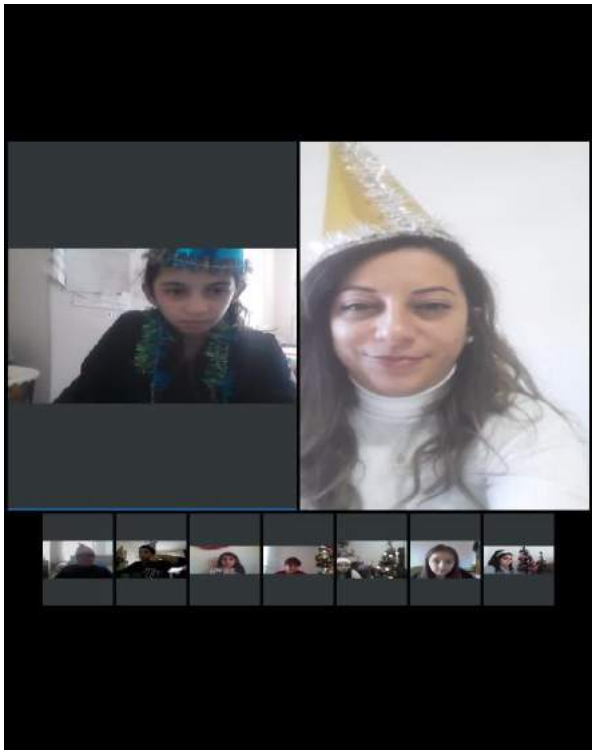
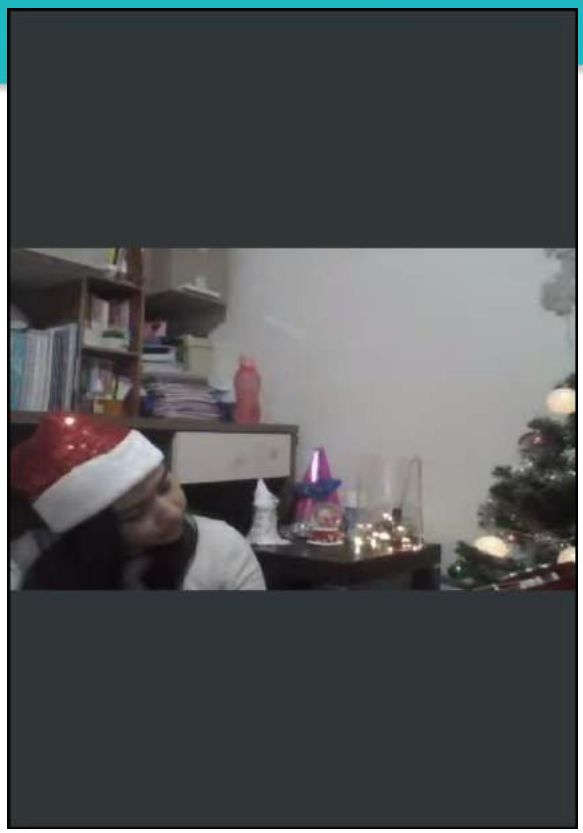
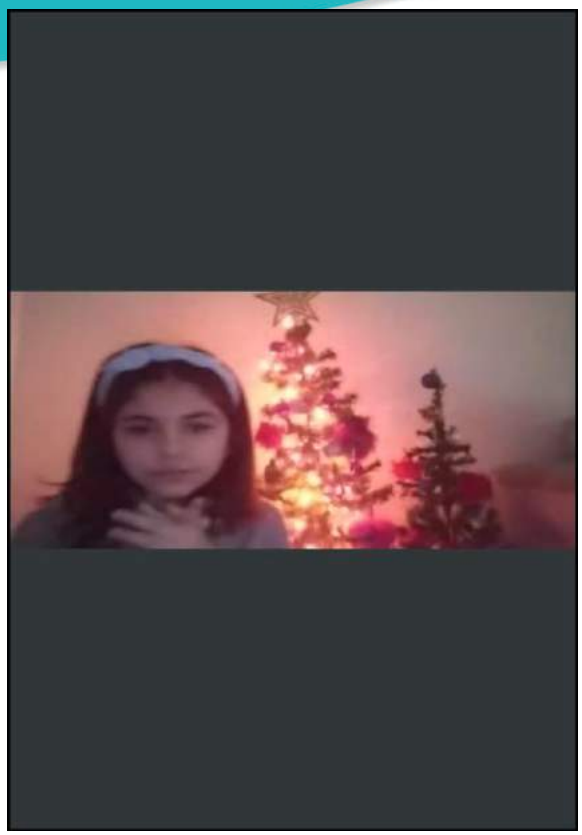
I WISH THE
NEW YEAR
BRING NEW
HOPES

NEW YEAR PARTIES







SPEAKING PRACTICE WITH HANDMADE PUPPETS

WE DESIGNED SOCK PUPPETS AND MADE SHORT CONVERSATIONS ABOUT OUR DAILY LIVES.

We don't need a classroom!

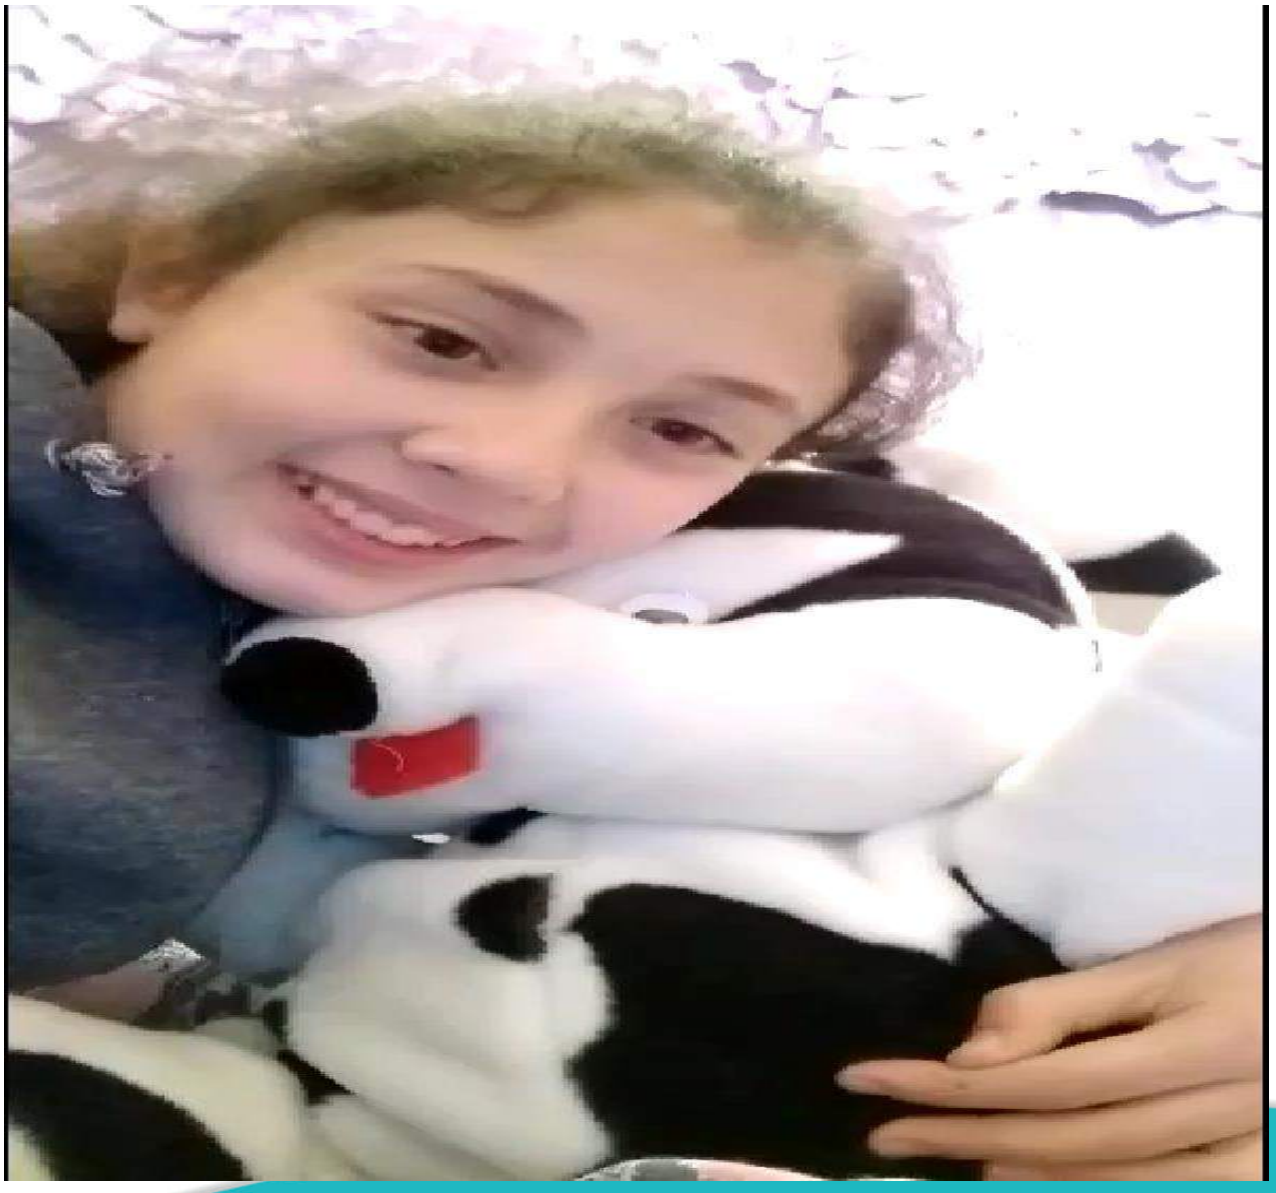
That's right. It has been a rough year. Pandemic still continues and we can't and shouldn't leave our homes unless necessary.

Yes, we miss the old days. And yes, we miss being out again but nothing can stop us from having fun everyday again and again! ☺

We are still carrying on our classes online and it is getting a lot more fun each day. ☺

*Describing Appearance and Personality!

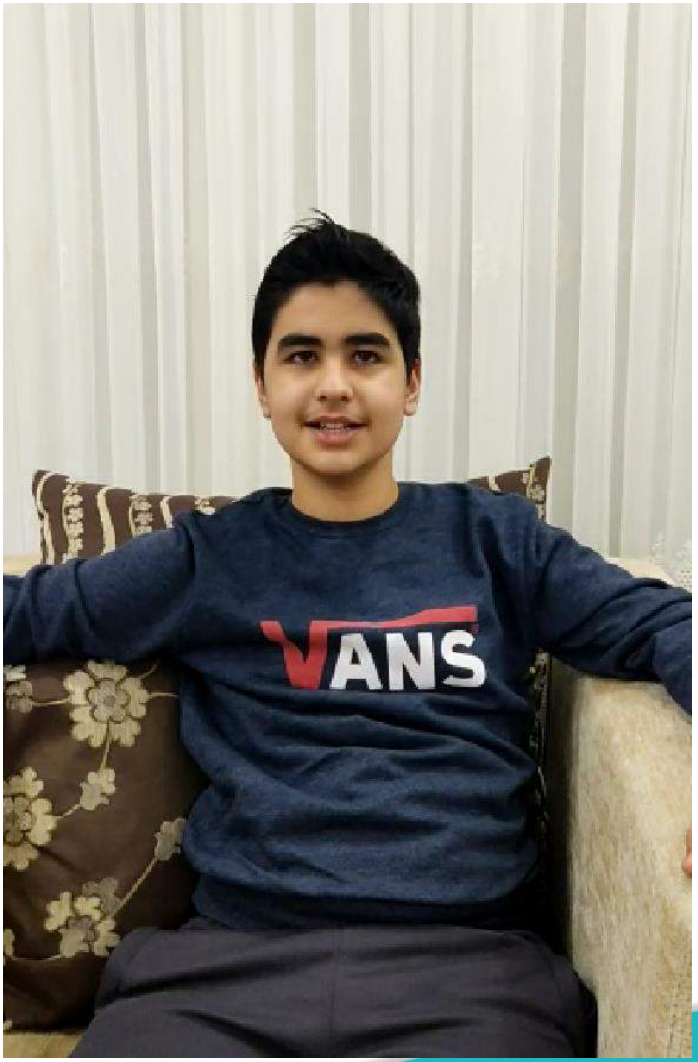
For the first unit we learned describing people and EVERYTHING around us. So our students made videos describing their beloved ones –even their dolls!-



*Interviewing Family Members!

We also learned talking about abilities –the things we can or can't do- as well as telling the things we are good at or bad at doing.

And we didn't only talk about ourselves. We made interviews with our family members and asked them what they are good or bad at doing.



VANS

*Scientist and Celebrities of Future!

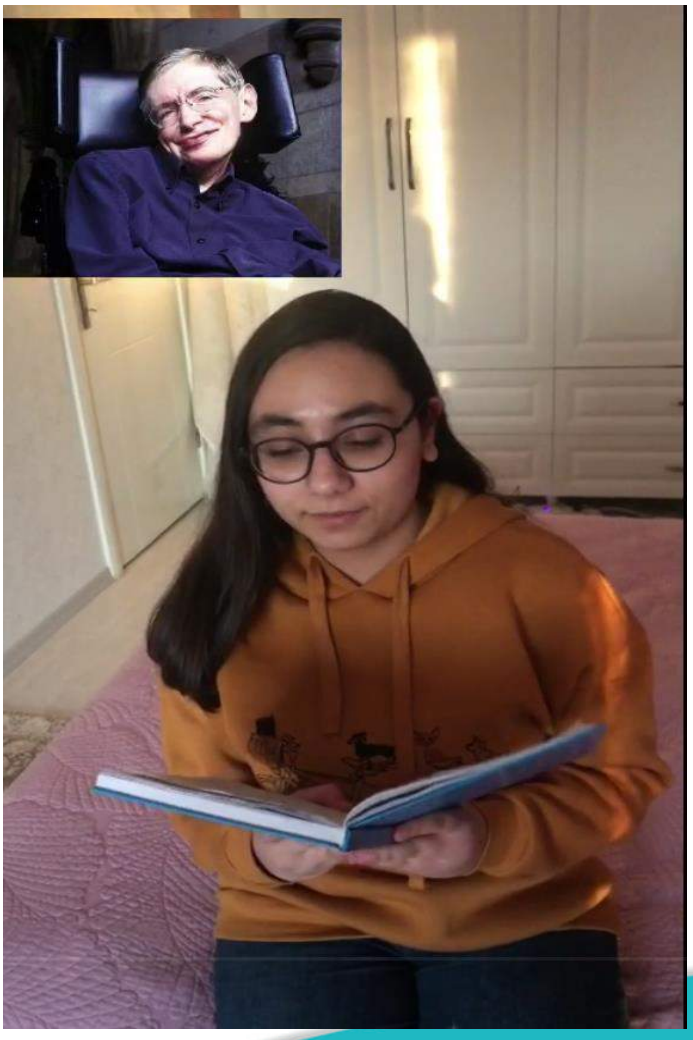
We have learned about the lives of famous people on unit 3. We read about their biographies and took inspiration from them. Then, everybody chose themselves a famous person and researched about him/her. These are the results: ☺

- Giorgio Armani –

- Ali KUŞÇU

- Louis Pasteur

- Stephen HAWKING



Aziz SANCAR

*And Of Course Online Studies and Follow-up

We use all kinds of technology to keep in touch and to keep learning. Researches, projects and homework is a part of this learning process.
